

CONTENTS

<i>Preface</i>	ix
<i>To the student . . . please read this first</i>	xi
<i>Acknowledgements</i>	xv

EM Essential Maths	1
EM 1 Numbers and Symbols	2
1 Positive and negative numbers: adding and subtracting	3
2 Positive and negative numbers: multiplying and dividing	5
3 Combining addition, subtraction, multiplication and division	9
4 Using a calculator	13
5 Introducing letters and symbols	19
6 Working with symbols: adding, subtracting, multiplying, dividing	27
EM 2 Simplifying Expressions	33
1 Equivalent fractions and cancelling	33
2 Adding and subtracting fractions	41
3 Multiplying and dividing fractions	46
4 Putting it all together – and a note on percentages	54
5 Expanding brackets	58
6 Factorising	65
7 Powers	72
8 Powers of products and quotients	82
9 Fractional powers	86
EM 3 Solving Problems	93
1 How equations arise	93
2 Solutions to equations: recognising and guessing	96
3 A method for solving equations	101
4 Formulating and solving equations	108
5 Rearranging equations and substituting	111
6 Inequalities	122
EM 4 Modelling Using Straight Lines	131
1 Introducing straight lines	131
2 Interpretation of a and b	138
3 Linear equations for modelling	144
4 Pairs of linear equations	148

MM	More Maths	159
	MM 1 Some Special Equations	160
	1 Introducing logs	160
	2 Solving equations when the unknown is a power	168
	3 Quadratic equations	174
	4 The expert equation solver	181
	MM 2 Modelling Using Curves	187
	1 Functions	187
	2 Quadratic curves	189
	3 Some common functions	200
	4 Variations on standard curves	205
	5 When do these curves arise?	209
	6 Curve sketching in general	213
	MM 3 Rates of Change	216
	1 The gradient of a curve	216
	2 More differentiation	223
	3 Interpreting derivatives	229
	4 Maximising and minimising	236
DD	Describing Data	249
	DD 1 Pictures of Data	250
	1 Frequencies and histograms	250
	2 Stem and leaf diagrams	259
	3 Bar charts, pie charts, time series plots and scatter plots	264
	DD 2 Summarising Data	273
	1 The centre of a set of data	273
	2 The spread of a set of data	280
	3 Σ and a short-cut for variance	285
	4 Quartiles	290
	5 Technology to the rescue!	292
	6 Constructing indices	296
	7 Grouped data	300
	8 Lies, more lies and statistics?	306
P	Probability	311
	P 1 Measuring Uncertainty	312
	1 Introduction to probability	313
	2 Combining events: AND and OR	327
	3 Conditional probability	336

4	Calculating joint or AND probabilities	344
5	More complicated probabilities – made simple!	351
P 2	Numerical Outcomes	358
1	Introducing random variables	358
2	Expectation: the long run average	366
3	The variance of a random variable	374
4	The binomial distribution	381
5	The Poisson distribution	399
P 3	Two or More Random Variables	410
1	Two random variables	410
2	Conditional probabilities and independence	417
3	Covariance and correlation	427
4	Sums and differences of random variables	434
P 4	Continuous Numerical Outcomes	448
1	Probability density functions (pdfs)	448
2	The exponential distribution	462
3	Introducing the normal distribution	472
4	Calculating normal probabilities	483
5	The normal approximation to the binomial distribution	494
S	Statistics	505
S 1	Estimation	506
1	Samples	506
2	Estimating from a sample	512
3	How good is an estimator?	519
4	Interval estimates	528
5	Beware, variance unknown!	538
S 2	Testing Hypotheses	546
1	Introduction to testing	546
2	The structure of a test	553
3	Tests for the mean	560
4	Rejection regions: another approach to testing	576
S 3	Correlation and Regression	585
1	Data which come in pairs	585
2	Fitting a straight line to the data	595
3	The linear regression model	606
4	Extending the linear regression model: the multiple linear regression model	622

S 4 Forecasting	631
1 Displaying time series	632
2 Introduction to forecasting	635
3 Coping with trend and seasonal effects	646
4 Forecasting series with a trend and seasonal effect	662
S 5 Comparing Two Populations	666
1 The difference between two means	666
2 Difference between two means: small samples	675
3 Paired samples	680
S 6 Categorical Data	688
1 Proportions	689
2 More than two categories	696
3 Contingency tables	705
BM Business Modelling	717
BM 1 Linear Programming Models	718
1 A small linear programming problem	719
2 More complicated linear programming models	727
BM 2 Planning Projects	738
1 Drawing a project planning network	738
2 Scheduling activities	745
BM 3 Models for Inventory Control	754
1 An inventory model	754
2 Making the model more realistic	759
BM 4 Time and Money	767
1 Calculating interest	767
2 Present values	776
3 Series of payments	784
BM 5 Controlling Quality	799
1 Control charts for the mean	799
2 R -charts and p -charts	808
BM 6 Simulating Reality	816
1 Why simulate?	816
2 A simple simulation	817
3 Generating random inputs	822
4 Simulating from other probability distributions	830
<i>Statistical tables</i>	838
<i>Index</i>	851
