Sensation, Perception and Action: An Evolutionary Perspective
Johannes M. Zanker

“ I was excited to see a book that included 'Action' both in the title and content since this aspect of perception is usually missing ...this book will help to complete the picture of perception and action. ”

Richard Wilkie, Lecturer in Perception, Action and Cognition, University of Leeds, UK

Welcome to the new Palgrave Macmillan Psychology catalogue.

Among the leading titles for 2010, we are delighted to be publishing an engaging new textbook by Johannes Zanker on Sensation, Perception and Action that sets this key area of cognitive psychology within a fascinating functional perspective. At the social end, *Social Psychology and Everyday Life* by Darrin Hodgetts et al. applies the theories of social psychology to daily experience and engages students in thinking about the role of psychology in fostering social justice. In a similar vein, the new edition of our popular *Community Psychology* text by Geoff Nelson and Isaac Prilleltensky is fully updated and includes new chapters and commentaries reflecting recent developments in the field.

2010 also brings a number of exciting new books and new editions of classic texts in all core areas of Psychology published by Worth Publishers and Sinauer Associates, Inc. and distributed by Palgrave Macmillan.

If you would like to find out more about our 2010 publishing program, please visit www.palgrave.com/psychology for further details. If you have any ideas for new books that you'd like to discuss further, please contact us directly by email.

Best wishes,

Jamie Joseph, Senior Commissioning Editor, Psychology
j.joseph@palgrave.com

INTRODUCTORY PSYCHOLOGY

Psychology

International Edition
6th edition

Peter O. Gray, Boston College, USA

A favourite for its exploration of psychology's major theories alongside the evidence that supports and refutes them, this text encourages students to probe for the 'whys' and 'hows' of the subject. The unique functionalist,

evolutionary, neuropsychological and cross-cultural perspective helps students to understand the value and applicability of each model. The sixth edition presents over 530 new research citations as well as new topics directly relevant to students' daily lives. Lecturer and student supplements are available.

Contents: PART I: BACKGROUND TO THE STUDY OF PSYCHOLOGY / Foundations for the Study of Psychology / Methods of Psychology / PART II: THE ADAPTIVENESS OF BEHAVIOR / Genetic and Evolutionary Foundations of Behavior / Basic Processes of Learning / PART III: PHYSIOLOGICAL MECHANISMS OF BEHAVIOR / The Neural Control of Behavior / Mechanisms of Motivation and Emotion / PART IV: SENSATION AND PERCEPTION / Smell, Taste, Pain, Hearing, and Psychophysics / The Psychology of Vision / PART V: THE HUMAN INTELLECT / Memory and Consciousness / Reasoning and Intelligence / PART VI: GROWTH OF THE MIND AND PERSON / The Development of Thought and Language / Social Development / PART VII: THE PERSON IN A WORLD OF PEOPLE / Social Perception and Attitudes / Social Influences on Behavior / PART VIII: PERSONALITY AND DISORDERS / Personality / Mental Disorders / Treatment / Statistical Appendix / Glossary / References / Name Index / Subject Index

Psychology

International Edition
9th edition

David G. Myers, Hope College, USA

A comprehensive and engaging introduction to Psychology, this is a textbook like no other, always fresh, always introducing new tools for teaching and learning, and always attuned to how the field is shaped by new research. The ninth edition

is now more concise, with 1200 new citations, enhanced pedagogy and a revised chapter on Consciousness. Lecturer and student supplements are available.

Contents: The Story of Psychology / Thinking Critically With Psychological Science / Neuroscience and Behavior / States of Consciousness / Nature, Nurture, and Human Diversity / Developing Through the Life Span / Sensation and Perception / Learning / Memory / Thinking and Language / Intelligence / Motivation and Work / Emotions, Stress, and Health / Personality / Psychological Disorders / Therapy / Social Psychology / Appendix A: Careers in Psychology, by Jennifer Zwolinski / Appendix B: Answers to Test Yourself Questions

February 2009 928pp 297x210mm

Psychology in Modules

9th edition

David G. Myers, Hope College, USA

This version of Myers' main text breaks the chapters down into shorter modules for more accessibility. The condensed text not only allows students to better grasp and explore psychological concepts, but also makes for

more flexibility in teaching, as cross-references to other chapters have been replaced with brief explanations. Lecturer and student supplements are available.

Exploring Psychology

8th edition

David G. Myers, Hope College, USA

David Myers' bestselling brief text has introduced psychology to millions. Exceptional writing and structure make the work supremely engaging and understandable. Updated coverage of consciousness, a new Critical Thinking feature,

new artwork and over 1,000 new citations ensure it remains the most compelling choice for a concise psychology text. Lecturer and student supplements are available.

Contents: Thinking Critically with Psychological Science / Neuroscience and Behavior / Nature, Nurture, and Human Diversity / The Developing Person / Sensation and Perception / States of Consciousness / Learning / Memory / Thinking, Language, and Intelligence / Motivation / Emotions, Stress, and Health / Personality / Psychological Disorders / Therapy / Social Psychology / Appendix: Careers in Psychology by Dr. Jennifer Lento, University of San Diego, USA

Published by Worth Publishers

Introductory Psychology

Tony Malim, sometime Head, School of Social Sciences, Weston-Super-Mare College, UK and **Ann Birch**, formerly Special Lecturer in Psychology, University of Bristol, UK

'Easily readable, interesting, with useful self-assessment questions, good figures and diagrams. Logical, relevant and clear presentation.'
- D.Holding, School of Health, Staffordshire University, UK

March 1998 1024pp 246x189mm
Paperback £30.99 978-0-333-66852-8

The Psychology Companion

Bridget Adams, formerly Principal Lecturer in Health Psychology, Buckinghamshire Chilterns University College, UK

'This book is likely to be a valuable resource for all psychology students throughout their degrees.' - Helen Galliard, Psych-Talk

'In a single volume, this book demystifies the divisions that bedevil

psychology and also provides a dictionary of terms and concepts and an unbiased history of the discipline. This is the companion students will keep by them throughout their psychology course, and probably long after.' - Christopher Spencer, Emeritus Professor, University of Sheffield, UK

'This book is a potential life-saver.' - Andrew White, Chartered Counselling Psychologist and Teacher, running an A Level Psychology course

The one-stop guide to studying Psychology at degree level. This book provides a thorough introduction to psychology as a discipline and offers guidance on what to expect from the course. An ideal study tool, the Companion includes advice on study skills, research methods, career pathways and helpful Psychology organizations.

Contents: PART 1: STUDYING PSYCHOLOGY / Context of Psychology / Your Psychology Course / Study Skills for Psychology / PART 2: APPROACHES IN PSYCHOLOGY / Ways of Looking at the Behaviour and Minds of People / Core Approaches / Other Approaches / PART 3: KEY TERMS AND CONCEPTS / PART 4: KEY THEORISTS AND STUDIES / History and Philosophy of Psychology / Alphabetical List of Key Theorists and Studies / PART 5: RESEARCH METHODS / Methodology and Ethical Issues / Key Terms and Concepts in Research Methods and Statistics / PART 6: CAREER PATHWAYS / Further Study, Accreditation and Transferable Skills / Psychology-related Careers / PART 7: LEARNING RESOURCES / Bibliography / Website References / Psychology Organisations and Institutions

Palgrave Student Companions Series

Introducing Psychological Research

Philip Banyard, Associate Senior Lecturer in Psychology, Nottingham Trent University, UK and Andrew Grayson, Lecturer in Psychology, The Open University, UK

'This book will be useful as a text for students enrolling on the BA. It covers the essential studies considered

throughout the degree.' - Lecturer in Social Psychology, Moray College, UK

'...the chapter on methodology is probably one of the best I have ever read...The writing is excellent and keeps the reader well engaged...Overall a great text that covers all the core studies and highlights the core themes...A superb book.' - PsychBLOG www.psychblog.co.uk

This edition provides full summaries of the most important psychological research studies and includes an expanded section on methodology. The studies have been selected to highlight the major areas of psychology and studies are grouped under headings of social, developmental, cognitive and biological psychology. An additional study, 'Kanzi or can't he?', is available to read online on the companion website.

Contents: PART I: SOCIAL PSYCHOLOGY / Social Influence / Social Judgements / Social Interaction / PART II: COMPARATIVE AND BIOLOGICAL PSYCHOLOGY / Learning / Comparative Psychology / Bio-Psychology / PART III: DIVERSITY / Identity / Abnormality / Individual Differences / PART IV: DEVELOPMENTAL PSYCHOLOGY / Attachment / The Classic Approaches / Communication / PART V: COGNITIVE PSYCHOLOGY / Memory / Perception / Mind and Thought / Attention / PART VI: PSYCHOLOGICAL METHODS / Analysing Data / Issues in Research / How Does Psychological Research Get Done?

PALGRAVE INSIGHTS IN PSYCHOLOGY SERIES

Series Editors: Nigel Holt and Rob Lewis

The Palgrave Insights in Psychology series provides short, readable introductions to a range of central issues and topics across the field of psychology. Written to be authoritative, accessible and affordable, these books appeal to a wide range of students by providing clear, up-to-date coverage in a manageable format.

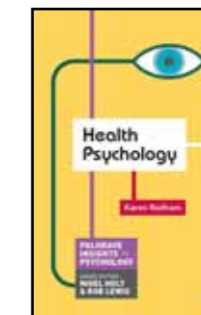

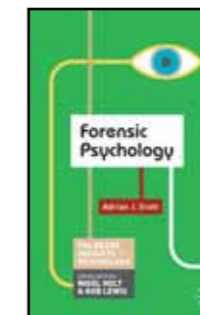

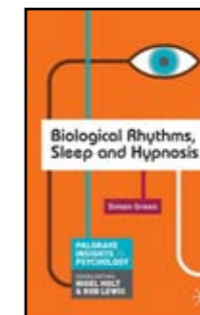

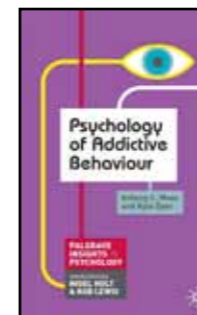

Psychology of Addictive Behaviours

Ian P. Albery, Professor of Psychology, London South Bank University, UK and Assistant Editor, Journal of Community and Applied Social Psychology, Anthony C. Moss, Senior Lecturer in Psychology, London South Bank University, UK and Kyle Dyer, Senior Research Fellow, Division of Mental Health, St. Georges, University of London, UK

This concise, clearly-written introduction will help cement students' understanding of the different theories surrounding addictive behaviours. The authors examine both behavioural and substance-related disorders, with chapters discussing biological, cognitive and moralistic perspectives, all organised around the key stages of addiction.

Contents: What is Addiction? / Understanding the Biology of Addiction / Understanding Addiction as a Learned Behaviour / Understanding Addiction as a Conscious Choice / Understanding Addiction as a Non-Conscious Choice / 'One Size Fits Some': Individual Difference Accounts of Addiction / Changing and Treating Addictive Behaviours / Preventing Addiction and Reducing its Harms

Sport Psychology

David Tod, Lecturer of Sport and Exercise Psychology, Joanne Thatcher, Senior Lecturer of Sport Psychology and Rachel Rahman, Lecturer in Psychology, all at Aberystwyth University, UK

In this student-friendly introduction, the authors consider the psychological effects of sport on both the individual and the group. Topics covered include motivation, performance, mental health and leadership, offering a balanced and in-depth resource for students interested in learning more about sport psychology.

Contents: INTRODUCTION TO SPORT AND EXERCISE PSYCHOLOGY / An Introduction to Sport and Exercise Psychology / SPORT AND THE INDIVIDUAL / Personality / Motivation / Aggression / SPORT PERFORMANCE / Arousal / Anxiety / Self-Confidence / SOCIAL PSYCHOLOGY OF SPORT / Group Cohesion / Audience Effects / Leadership and Coaching / EXERCISE PSYCHOLOGY / Exercise and Physical Health / Exercise and Mental Health / PART SIX: ISSUES IN SPORTS AND EXERCISE / Issues in Sport and Exercise

August 2010	200pp	216x138mm
Paperback	£9.99	978-0-230-24987-5

The Psychology of Relationships

Julia Willerton, Associate Lecturer, The Open University, UK

This introduction focuses on the key aspects of human relationships including their development, maintenance and breakdown. Ideal for students who want a more rounded and detailed text on this area, the author discusses the role of evolution, individual differences and the effects of relationships on mental and physical health.

Contents: The Evolutionary Basis of Human Relationships / Developing Relationships / Regulating Relationships / Individual Differences in Relationships / Effects of Relationships / Perspectives in Relationships / Research Methods in Relationships / Glossary

August 2010	200pp	216x138mm
Paperback	£9.99	978-0-230-24941-7

RESEARCH METHODS AND STATISTICS

Critical Narrative Analysis in Psychology

A Guide to Practice

Peter Emerson, Family Therapist and Stephen Frosh, Professor of Psychology and Pro-Vice-Master, Centre for Psychosocial Studies, Birkbeck College, University of London, UK

'...much more than a simple 'how-to' guide. It is a truly fine theoretical exegesis presenting the latest trends in discursive research and critical psychosocial thinking in ways which will inspire and intrigue clinical and psychotherapeutic practitioners as well as social science audiences.'

- Professor Margaret Wetherell, Director ESRC Identities Programme, The Open University, UK

Presenting an approach to narrative analysis from a critical social perspective, this book focuses on narrative texts from a boy labelled as 'sexually abusive', analyzed from micro to global levels. The book demonstrates the power of narrative analytic procedures and the different effects produced by different levels of analysis.

Contents: Acknowledgements / Introduction - Psychosocial Studies and Critical Narrative Analysis / Questioning and Transcribing: How to Gain Access to Personal Narratives / Linguistic Tools and Interpretive Levels: Beginning Interpretation / Building a Rabbit Run: Doing Thematic Interpretation / Canonical Narratives and Cultural Orders: Moving Analysis to a more Molar Level / Claims and Counterclaims: Working Critically with Narratives

Doing a Successful Research Project

Using Qualitative or Quantitative Methods

Martin Brett Davies, Professor Emeritus, University of East Anglia, UK

'This is one of the most clearly written and engaging books for the beginning researcher I have encountered. It is a practical, no-nonsense and encouraging book as well.' - Elizabeth Watson, Senior Lecturer, School of Social Sciences, University of Western Sydney, Australia

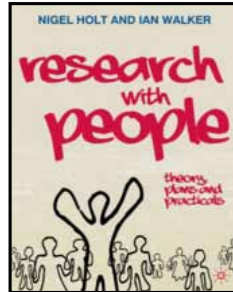

Doing a Successful Research Project offers an accessible, even-handed introduction to carrying out research methods for undergraduate and postgraduate students conducting a research project for the first time. It guides students carefully through the process from planning to completion, whilst assessing the different strategies available.

Contents: PART 1: PLANNING YOUR RESEARCH PROJECT / So you're going to do a Research Project / Let's Make a Start / Drawing up your Personal Project Roadmap / PART 2: QUANTITATIVE RESEARCH / The Principles of Sampling / Carrying Out Your Survey / Questionnaires / The Art and Science of Survey Interviewing / Analysing Your Survey Data / PART 3: QUALITATIVE RESEARCH / Studying a Small Sample / Qualitative Research Interviewing / There is More to Qualitative Research than Interviewing / Analysing Qualitative Data / PART 4: THE LAST LAP / Writing Your Report / PART 5: INTO MORE COMPLEX TERRITORY / A Qualitative Researcher's Briefing Sheet / Testing for Statistical Significance

Paperback	£14.99	978-1-4039-9379-3

Research with People

Nigel Holt, Bath Spa University, UK and Ian Walker, University of Bath, UK

'... full of useful information especially for those beginning to explore research and experimental design. Conducting good-quality psychology research can seem daunting to begin with but this book shows how good planning can make research easy.' - Helen Galliard, *Psych-Talk*

'This is the first research methods book that made me smile! It is a great 'how-to' guide... a great resource for undergraduates, making the research process less painful for them and their supervisors!' - Dr Nicola Fear, Senior Lecturer, Institute of Psychiatry, University of London, UK

'Holt and Walker manage to discuss the complex concepts involved clearly, simply and engagingly, using everyday examples to both inform and entertain the reader.' - Dr Nick Lund, Senior Lecturer, Manchester Metropolitan University, UK

Whether analyzing attitudes, measuring opinions or observing habits, researchers who investigate people's behaviour need a wide range of techniques at their disposal. Research with people provides a unique introduction to these methods that is both clear and accessible. Through a series of sample practicals, Holt and Walker guide the student step-by-step through the process of designing and carrying out research. The authors, both experienced lecturers and researchers, use these practicals to explain theories of research design and teach how to choose the right technique for a given research topic every time. *Research with People* is full of handy and reassuring advice that makes it ideal as a class textbook or as a private study guide.

Contents: PART I: THINKING ABOUT RESEARCH / The Problem with People: Variation and Hypothesis Testing / Who Will You Study? Samples and Populations / How Will You Describe Your Findings? / What Have You Found? Inferential Statistics / PART II: DOING RESEARCH / Designing a Study: Running For The Bus / Designing a Study: The Best Way To Manage People / Practical: It's a Matter of Taste / Practical: Abnormal Cells on a Slide - How People Search for Things / Practical: Constructing Memories / Practical: I'm Trying to Concentrate! / Practical: What Do You think? Attitude Research / Practical: Something's Not Right / Practical: Too Many Cooks Or Not Enough Heads? / Practical: Head Size and Intelligence / PART III: THE REALLY USEFUL SECTION / Thinking Critically: Don't Believe Everything you Read / Sample Write-ups / Glossary

Social Research

3rd edition

Sotirios Sarantakos, Adjunct Professor, Department of Humanities and Social Sciences, Charles Sturt University, Australia

The third edition offers a clear and scholarly introduction to social research methods for undergraduates across a range of social science disciplines. It is compact

and orderly in its presentation and balanced in its discussion of different methods. Organized to reflect the stages of the research process, from questions through to answers, the book is nonetheless more than a research methods recipe book, providing students with an insight into theoretical questions as well as into practical challenges and issues.

SPSS: A User Friendly Approach

Jeffery E. Aspelmeier and Thomas W. Pierce, both at Radford University, USA

In this comprehensive introduction to SPSS the authors make potentially complicated procedures and concepts easy to understand, easy to complete, and fun to work with. Readers are taught not only how to complete

a procedure within SPSS but also how to ensure that the results are statistically meaningful.

SPSS for Psychologists

4th edition

Nicola Brace, Senior Lecturer in Psychology, The Open University, UK, Richard Kemp, Senior Lecturer, Department of Psychology, University of New South Wales, Australia and Rosemary Snelgar, Principal Lecturer in Psychology, University of Westminster, UK

'The best SPSS book... Every student should have a copy!' - Dr James Jackson, Associate Senior Lecturer, Leeds Trinity & All Saints, UK

'...I would recommend the book to anyone who is doing research which involves statistical analysis. The text is clear and easy to understand, and also highly informative and I can confidently

say it is one which I will be frequently referring to in the foreseeable future.' - Cherie Armour, *PsyPag Quarterly*

'This is the clearest guide to using SPSS I have found – the step-by-step framework provides an easy to follow overview, as well as more in-depth explanation for those who need it. From the very simple to the more complex, this text is ideal for all levels of an undergraduate degree and beyond.' - Dr Fhionna Moore, Lecturer in Psychology, University of Abertay Dundee, UK

'A highly accessible introductory text that many students favour for its clarity and thoroughly annotated SPSS screenshots.' - Dr Alistair Harvey, Lecturer in Psychology, University of Winchester, UK

Guiding readers through the latest SPSS package (also known as PASW Statistics), the authors provide clear step-by-step instructions on the main statistical techniques, now with expanded sections on graphing and exploring data. The fully updated fourth edition of this bestseller, now in colour, remains an essential tool for all psychology students.

Contents: Introduction / Data Entry in SPSS / Exploring Data in SPSS / Data Handling / Tests of Difference for Two Sample Designs / Tests of Correlation / Tests for Nominal Data / Analysis of Variance / Multiple Regression / Analysis of Covariance and Multivariate Analysis of Variance / Discriminant Analysis and Logistic Regression / Factor Analysis, and Reliability and Dimensionality of Scales / Beyond the Basics

Statistics for the Behavioral Sciences

Susan A. Nolan, Seton Hall University, New Jersey, USA and Thomas E. Heinzen, William Paterson State University of New Jersey, USA

This beautifully written text makes statistics accessible to psychology students through the use of integrated narratives and wide-ranging examples. A refreshing

text that emphasizes the link between research design and statistical analysis, it also promotes graphic literacy, and offers guidelines on how to report results. Lecturer and student supplements are available.

DEVELOPMENTAL PSYCHOLOGY

How Children Develop

International Edition

3rd edition

Robert S. Siegler, Carnegie Mellon University, USA, Judy S. DeLoache, University of Virginia, USA and Nancy Eisenberg, Arizona State University, USA

How Children Develop provides a fresh approach to the topically-organized child development course. It presents the latest research without overwhelming students with detail, and is backed by a full range of media and supplements. The third edition features new pedagogy and updated coverage of neuroscience, child welfare, and gender development. Lecturer and student supplements are available.

Contents: An Introduction to Child Development / Prenatal Development and the Newborn Period / Biology and Behavior / Theories of Cognitive Development / Seeing, Thinking, and Doing in Infancy / Development of Language and Symbol Use / Conceptual Development / Intelligence and Academic Achievement / Theories of Social Development / Emotional Development / Attachment to Others and Development of Self / The Family / Peer Relationships / Moral Development / Gender Development / Conclusions / Glossary / References / Name Index / Subject Index

The Development of Children

International Edition
6th edition

Cynthia Lightfoot,
Pennsylvania State
University, USA, **Michael
Cole**, University of California,
San Diego, USA and **Sheila R.
Cole**, former Journalist
specializing in writing about
families, children,
development, and education

Taking a chronological
approach, the book
uses a broad scientific

framework to present development as an interaction of biological, social, and psychological processes and human culture. The sixth edition has been completely revised, with thirty percent new material and coverage of hot topics. Lecturer and student supplements are available.

Contents: The Study of Human Development / PART 1: IN THE BEGINNING / Biocultural Foundations / Prenatal Development and Birth / PART 2: INFANCY / The First Three Months / Physical and Cognitive Development in Infancy / Social and Emotional Development in Infancy / PART 3: EARLY CHILDHOOD / Language Acquisition / Physical and Cognitive Development in Early Childhood / Social and Emotional Development in Early Childhood / Contexts of Development / PART 4: MIDDLE CHILDHOOD / Physical and Cognitive Development in Middle Childhood / School as a Context for Development / Social and Emotional Development in Middle Childhood / PART 5: ADOLESCENCE / Physical and Cognitive Development in Adolescence / Social and Emotional Development in Adolescence / Appendix / Glossary / References / Indexes

Understanding Human Development

Biological, Social and Psychological Processes
from Conception to Adult Life

Stephanie Thornton,
Visiting Fellow, University of
Sussex, UK

'This refreshing
introduction successfully
integrates a wide variety
of literatures. Thornton
has done an excellent job
framing this text in terms
of broad developmental
questions, and has

created a text that is both engaging and
provocative.' - Jessica Giles, Assistant Professor
of Psychological Sciences, Vanderbilt University,
USA

'A thorough and truly accessible review of
developmental psychology as it has unfolded
over the past two centuries. This text is a
remarkable achievement.' - Catherine O'Hanlon,
Lecturer in Developmental Psychology,
Newcastle University, UK

How does a fertilized egg become a person?
How do the processes which shape the common
themes of human development also produce the
rich variety of individual diversity? Lively and wide
ranging, this book critically reviews research on
human development from the early days to the
theories and issues of the twenty-first century.

Contents: Studying Human Development / PART A:
THE BEGINNING OF LIFE / Bodies and Brains / Infant
Minds: Perception, Inference and Understanding in
the First 18 Months / Growing Emotions: Social and
Personal Development in the First 18 Months / PART
B: COGNITIVE DEVELOPMENT FROM INFANCY TO
ADULTHOOD / Language / Reasoning and Conceptual
Understanding / Memory, Problem-Solving and
Mechanisms of Cognitive Development / Individual
Differences in Cognition / PART C: SOCIAL AND
EMOTIONAL DEVELOPMENT FROM INFANCY TO
ADULTHOOD / Overview / Understanding Other
People / Personality and Identity / Social Relationships /
Prosocial and Antisocial Behaviour / A FINAL COMMENT
/ Toward a New View of Development

Growing Minds

An Introduction to Cognitive Development

Stephanie Thornton,
Visiting Fellow, University of
Sussex, UK

'Engaging...a very
clear and enthusiastic
introduction to what
is a complex and ever-
changing field, offering
important new material
that has been lacking in
many previous texts...

Accessible to students with no prior knowledge
of child development.' - Dr Sarah Paterson,
Neurocognitive Development Unit, Institute of
Child Health, UK

With its emphasis on critical understanding of
research methods as well as current theories, this
book makes an ideal introduction to the study
of cognitive development. Written for students
new to the topic, the text presents complex
ideas through familiar analogies and concrete
illustrations and conveys the excitement of
research in this dynamically expanding field.

Contents: Studying How Minds Grow / Infant Minds
/ Language, Communication and Sharing Experience
/ Reasoning and Remembering / Conceptual
Development and Reasoning / Planning and Problem
Solving / What Drives Development? / Individual
Differences / Conclusions and Overview / Index

The Developing Person Through the Life Span

7th edition

Kathleen Stassen Berger,
Bronx Community College,
City College of New York,
USA

The seventh edition of this
chronological textbook
comes with significant
revision of cognitive
development throughout
childhood, revised and
updated chapters on
adolescence, and more

attention to emerging and early adulthood.
It contains new research on everything from
genetics to the timing of puberty, including brain
development, life span disorders and cultural
diversity. Lecturer and student supplements are
available.

Culture & Psychological Development

Edited by Dabie Nabuzoka,
Principal Lecturer in
Psychology, Leeds
Metropolitan University, UK
and **Janet Empson**, Principal
Lecturer in Psychology,
School of Social Science and
Law, Sheffield Hallam
University, UK

'This is most suitable for
a final year psychology
option, and it can

strongly be recommended as supplementary
reading for any human development course. It
makes a very useful distinction between cultural
psychology and the cross-cultural, and it has a
strong research emphasis. There are very few
up-to-date texts in this area, it will corner the
market!' - Dr Dave Hiles, Principal Lecturer in
Psychology, De Montfort University, UK

An enlightening introduction to the impact of
social and cultural factors on human development.
The authors consider how factors such as family,
ethnicity, and the wider community all influence
the development of behaviour, encouraging
the reader to (re)evaluate various psychological
theories in the light of cross-cultural evidence.

Contents: Introduction and Overview / D.Nabuzoka:
Culture's Influence on Psychological Development
/ D.Nabuzoka: Approaches to Studying Human
Development in Diverse Cultures / C.Jávo: Child-Rearing
Goals and Practices / J.Empson: Social Disadvantage and
Child Development / J.Empson & D.Nabuzoka: Culture
and Cognitive Development / D.Nabuzoka: Language and
Psychological Development / R.Takriti: The Development
of Cultural and Ethnic Identity / D.Nabuzoka & J.Empson:
The Role of Culture in Applied Developmental Psychology
/ Glossary

International Perspectives on Early Childhood Research

A Day in the Life

*Edited by Julia Gillen, Senior Lecturer in Digital
Literacies, Literacy Research Centre, Lancaster University,
UK and Catherine Ann Cameron, Honorary Professor of
Psychology, University of British Columbia, Canada*

Presenting an innovative take on researching early
childhood, this book provides an international
comparison of the cultural and familial influences
that shape the growth of young children. The book
presents a unique methodology, and includes
chapters on musicality, security, humour and
eating.

Contents: Preface / J.Gillen & C.A.Cameron: Introduction

Children, Food and Identity in Everyday Life

Edited by Allison James,
Professor of Sociology,
University of Sheffield, UK,
Anne-Trine Kjørholt,
Associate Professor and
Vebjørg Tingstad, Associate
Professor, both at Norwegian
University of Science and
Technology, Norway

This book explores the
significance of food
practices for childhood

identities, from early babyhood to middle
childhood and teenage years. It examines how
children and families negotiate food and eating
practices; what influence the media has on these;
the role institutions play; and how far class and
ethnicity shape the food that children eat.

Radical Pedagogy

Identity, Generativity, and Social Transformation

Mark Bracher, Professor of English and Director, Center for Literature and Psychoanalysis, Kent State University, USA

'Bold, sophisticated, and provocative... Mark Bracher argues that teachers who understand the dynamic of identity will not only be able to facilitate deeper learning, they will also be able to position students to become more sensitive to questions of social justice. This is a must read for anyone committed to education, civic engagement, and social change.' - Lynn Worsham, Professor of English, Illinois State University, USA

This book argues that longstanding pedagogical aims and practices are ineffective in promoting learning and social change and proposes a new strategy for achieving these ends.

Contents: Introduction / PART I: IDENTITY, LEARNING, AND SOCIAL PROBLEMS / Identity, Motivation, and Recognition / Linguistic Identity / Affective and Imagistic Identity / Identity Integration and Defenses / Identity Structure / PART II: IDENTITY-UNDERMINING PEDAGOGIES / Teachers' Identities as Obstacles to Radical Pedagogy / Authoritarian and Establishment Pedagogies / Pedagogies of Resistance and Empowerment / Historicism as Obstacle to Radical Pedagogy / PART III: DEVELOPING TEACHERS' IDENTITIES / Self Analysis for Teachers / Generative Identity and the Need to Teach / PART IV: PROMOTING STUDENTS' IDENTITY DEVELOPMENT / Supporting Pro-Social Identity Contents / Promoting Identity Integration / Developing Students' Identity Structures

Twins in Society

Parents, Bodies, Space and Talk

Kate Bacon, Lecturer in Sociology, University of Central Lancashire, UK

This book explores what it means to be a twin and to what extent twins can shape or 'escape' their identities as twins. It investigates how social expectations about twins shape twins' lives and how twins utilize their bodies, space and talk to actively display and perform their own identities.

The Palgrave Handbook of Childhood Studies

Edited by Jens Qvortrup, Department of Sociology, Norwegian University of Science and Technology, Norway, William A. Corsaro, Department of Sociology, Indiana University, USA and Michael-Sebastian Honig, University of Trier, Germany

'The Handbook of Childhood Studies is an excellent resource: comprehensive in scope, interdisciplinary in content, well-chosen topics, with thoughtful essays by major figures in the field. It's a treasure!' - Barrie Thorne, Professor of Sociology, University of California, Berkeley, USA and co-editor of *Childhood: A Global Journal of Child Research*

'...brimming full of insights and will help to shape theoretical and empirical agendas for researchers within the ever-broadening field of childhood studies.' - Michael Wyness, Associate Professor of Childhood Studies, University of Warwick, UK

A landmark publication in the field, this state of the art reference work, with contributions from leading thinkers across a range of disciplines, is an essential guide to the study of children and childhood, and sets out future research agendas for the subject.

SOCIAL PSYCHOLOGY

Social Psychology and Everyday Life

Darrin Hodgetts, Associate Professor, University of Waikato, New Zealand, Neil Drew, Dean, University of Notre Dame - Fremantle, Australia, Christopher Sonn, Senior Lecturer, Victoria University, New Zealand, Otille Stolte, Lecturer, Linda Waimarie Nikora, Senior Lecturer and Cate Curtis, Lecturer, all at University of Waikato, New Zealand

'...more engaging and more thought-provoking than any other Social Psychology text I have read.' - Dr Caroline Howarth, Social Psychology, London School of Economics and Political Science, UK

'Social Psychology in Everyday Life does what social psychology textbooks rarely dare to do: it applies the theories of social psychology to the everyday world we actually inhabit. Starting with social problems and experiences to which students can easily relate, the text then leads us from one insight to the next to show how social psychology can transform the world around us.' - Alex Gillespie, Lecturer in Psychology, University of Stirling, UK

'I typically respond with great suspicion to textbooks that are a bit 'outside the square'. But this textbook is different: It embraces mainstream meta-theories in social psychology and puts them up-side-down in a way that respects the intelligence and sensitivities of the average reader. It does it in a way that is likely to appeal and be acceptable to a large audience.' - Dr Stefania Paolini, Social Psychology lecturer, University of Newcastle, Australia

This innovative textbook provides a refreshing, international introduction to the subject and encourages students to consider the potential of social psychology to transform lives. Everyday scenarios highlight the relevance of core topics to a multicultural society and make the key theories and concepts of the discipline come to life. By integrating core social psychology theories and concepts with more critical perspectives, *Social Psychology and Everyday Life* provides a valuable, broad, coherent and stimulating introduction to the field. The book also situates social psychology within the broader social sciences, and in particular scholarship on media, place, health, justice, indigeneity, immigration, and social change.

Contents: Introduction to the Social Psychology of Everyday Life / A History of Social Psychology / Contemporary Social Psychology and the Focus on Everyday Life / Making Sense of Everyday Knowledge / Indigenous Psychologies and the Social Psychology of Everyday Life / Social Psychology and Place / Immigrations, Acculturation and Settlement / Understanding Health and Illness / Social Justice in Everyday Life / Pro-social Behaviour and Critical Humanism / Media and Daily Practice / Towards Social Psychologies of Everyday Life

Applying Social Psychology

John Kremer, *Reader in Applied Social Psychology, Noel Sheehy, Professor of Psychology, both at Queen's University Belfast, UK, Jacqueline Reilly, Research Fellow, UNESCO Centre, University of Ulster at Coleraine, UK, Karen Trew, Senior Lecturer in Psychology and Orla Muldoon, Lecturer in Psychology, Queen's University Belfast, UK*

As an applied science, social psychology has tremendous potential to provide insight into so many aspects of our social world. Unfortunately, its relevance is not always highlighted in traditional introductory texts. To remedy this problem, *Applying Social Psychology* takes a different approach, using significant social themes (including work, education, health, sport, conflict, communication, economic life, crime, the environment) to illustrate how multiple perspectives can work together in helping understand the complexities of real life issues.

Contents: Introduction / The Environment / Work / Health and Illness / The Community / Communication and the Media / Education / Economic Life and Consumerism / Crime and the Law / Sport, Exercise and Leisure

Critical Social Psychology

An Introduction

Brendan Gough, *Chair of Research Committee, Division of Psychology, School of Social Sciences, Nottingham Trent University, UK and Majella McFadden, Senior Lecturer in Psychology, Sheffield Hallam University, UK*

'The problem with most texts so far in this field is that they are written in a jargon-laden way, assuming theoretical

starting points that many just do not understand. These authors keep their eye firmly on a student audience unfamiliar with these issues, accessibly covering the debates surrounding traditional social and critical social psychology by deliberately reproducing the format of a traditional social psychology textbook, and tracking the issues and debates from mainstream work as they introduce critical ideas.' - Professor Ian Parker, *Manchester Metropolitan University, UK*

September 2001 272pp 234x156mm

Identity Studies in the Social Sciences

Series Editors: Margaret Wetherell and Valerie Hey

Theorizing Identities and Social Action

Edited by Margaret Wetherell, *Professor of Social Psychology, The Open University, UK*

'... a landmark text for social scientists across a large transdisciplinary domain, from psychosocial studies to social theory.' - Professor Stephen Frosh, *Birkbeck College, University of London, UK*

This collection brings together leading scholars to explore the 'doing' and 'making' of identities. Drawing on the highly innovative ESRC Identities and Social Action Programme, the chapters take core social actions – such as performing, excluding, mixing, bonding – and demonstrate how social practices and identities unfold together.

Contents: M. Wetherell: Introduction: The Identity/ Action Relation / PART I: BIOGRAPHIES AND PERSONAL TRAJECTORIES / H. Elliott, Y. Gunaratnam, W. Hollway & A. Phoenix: Practices, Identification and Identity Change in the Transition to Motherhood / J. Kirk, C. Wall & S. Jefferys: Biography, Education and Civic Action: Teaching Generations and Social Change / N. Yuval-Davis & E. Kaptani: Performing Identities: Participatory Theatre Among Refugees / G. Jones & S. T. De Benitez: Tales of Two or Many Worlds? When 'Street' Kids go Global / PART II: INTERACTIONS AND INSTITUTIONS / E. Stokoe & D. Edwards: Accomplishing Social Action with Identity Categories: Mediating and Policing Neighbour Disputes / S. Speer: Passing as a Transsexual Woman in the Gender Identity Clinic / C. Antaki, M. Finlay & C. Walton: Identity at Home: Offering Everyday Choices to People with Intellectual Impairment / PART III: COMMUNITIES, CITIES AND NATIONS / J. Willis: Identity Making for Action: The Example of London Citizens / K. Schmid, M. Hewstone, J. Hughes, R. Jenkins & E. Cairns: Residential Segregation and Intergroup Contact: Consequences for Intergroup Relations, Social Capital and Social Identity / C. Watters, R. Hossain, R. Brown & A. Identity Studies in the Social Sciences

Series Editors: Margaret Wetherell and Valerie Hey

Approaches to the Individual

The Relationship between Internal and External Conversation

Athanasia Chalari, Lecturer in Sociology, University of Manchester, UK

This study sees 'mediation' as a way of understanding the relationship between internal and external conversation, which underpins how individuals are connected to society. The relationship between these aspects of conversation is crucial in allowing selves to achieve

subjectively-defined 'balance' between inner and outer worlds.

The Sociology of Elite Distinction

From Theoretical to Comparative Perspectives

Jean-Pascal Daloz, CNRS Research Professor, University of Oxford, UK

This major new contribution to the study of consumption examines how dominant groups express and display their sense of superiority through material and aesthetic attributes, demonstrating that differences from one society to another, and across historical

periods, challenge current understandings of elite distinction.

Intimacy, Transcendence and Psychology

Closeness and Openness in Everyday Life

Steen Halling, Professor of Psychology, Seattle University, USA

'... beautifully written... The book is a glowing testimony to the phenomenological approach advocated by the author.' - Jonathan A. Smith, Professor of Psychology, Birkbeck College, University of London, UK

This book addresses the richness and depth of our intimate relationships and especially those moments when we come to see ourselves and the other person in a new way. Halling goes on to say that however much we are influenced by heredity and up-bringing, we are also agents with the capacity for openness and transcendence.

Contents: Introduction: On the Disappearance and Appearance of Persons / Seeing a Significant Other 'As if for the First Time' / On Being Disillusioned by a Significant Other / Forgiving Another, Recovering One's Future / Experiencing the Humanity of the Disturbed Person / On the Study of Human Experience / Interpersonal Relations and Transcendence / Psychology, Transcendence and Everyday Life

The Impact of 9/11 on Psychology and Education

The Day that Changed Everything?

Edited by Matthew J. Morgan, Director, Business Systems Analyst Group, Starwood Hotels

'This collection of well-written, timely, inter-woven essays will prove of great value to psychologists and educators at all levels from the novice student to the experienced expert.' - Fathali M. Moghaddam, Professor of

Psychology, Georgetown University, and author of *How Globalization Spurs Terrorism*

The Impact of 9/11 on Psychology and Education is the fifth volume of the six-volume series *The Day that Changed Everything?* edited by Matthew J. Morgan, and featuring forewords by Robert Sternberg and Philip Zimbardo.

Contents: R.J. Sternberg: Foreword / P.G. Zimbardo: Foreword / PART I: PSYCHOLOGY AND TRAUMA / PART II: GENERATIONAL EFFECTS / PART III: TERRORISM AND EDUCATION

Dangerous Discourses of Disability, Subjectivity and Sexuality

Margrit Shildrick, Reader in Gender Studies, Queen's University Belfast, UK

This innovative and adventurous work uses broadly feminist and postmodernist modes of analysis to explore what motivates damaging attitudes and practices towards disability. Margrit Shildrick argues for the significance of the psycho-social imaginary, and suggests a way forward in

disability's queering of normative paradigms.

Contents: Acknowledgments / Introduction / Corporealities / Genealogies / Contested Pleasures and Governmentality / Sexuality, Subjectivity and Anxiety / Transgressing the Law / Queer Pleasures / Global Corporealities / Conclusion: Thinking Differently / Notes / Bibliography / Index

Discovering Human Sexuality

Simon LeVay, British-born Neuroscientist turned Science Writer and Teacher, USA and Janice Baldwin, Sociologist, University of California, Santa Barbara, USA

This alternative version of LeVay and Baldwin's acclaimed text *Human Sexuality* is more accessible to students

with a limited background in biology, but maintains the evidence-based approach and readability of the original. The language and terminology throughout are more comprehensible, making it suitable for interdisciplinary study.

Understanding the Psychology of Internet Behaviour

Virtual Worlds, Real Lives

Adam Jonson, Lecturer in Educational Technology, The Open University, UK

The Internet is transforming business, education, and maybe even ourselves. In this timely and unique text, Adam Jonson provides a clear, engaging and lively summary of the psychology of the Internet, while at the same time drawing lessons from previous

technologies as diverse as the early telephone, telegraph and even radio hams. Mixing anecdote with findings from psychological studies, this book provides a clear, compelling and insightful vision of the psychology of the Internet, and the implications for the design of future technologies. It is an invaluable resource for anyone studying Internet behaviour or interested in their own or others' online behaviour.

Self Efficacy

The Exercise of Control

Albert Bandura, Stanford University, USA

Renowned psychologist Albert Bandura's theory is that those with high self-efficacy expectancies (the belief that one can achieve what one sets out to do) are healthier, more effective and generally more successful than those with low self-efficacy expectancies. The author begins with a discussion of theory and method and then examines how belief in one's abilities affects development, mental functioning and health, with examples from the areas of psychopathology, athletics, business and international issues.

BIOLOGICAL PSYCHOLOGY

Biological Psychology

An Introduction to Behavioral, Cognitive, and Clinical Neuroscience
6th edition

S. Marc Breedlove, Michigan State University, USA, Neil V. Watson, Simon Fraser University Canada and Mark R. Rosenzweig, sometime University of California, Berkeley, USA

Biological Psychology is a comprehensive, authoritative survey of the biological bases of behaviour.

Its readers will benefit from an outstanding art program, and a broad perspective. The sixth edition features thoroughly revised coverage of Cognitive Neuroscience, as well as new material in keeping with the latest breakthroughs in research throughout the book. Lecturer and student supplements are available.

Contents: Biological Psychology: Scope and Outlook / PART I: BIOLOGICAL FOUNDATIONS OF BEHAVIOR / Functional Neuroanatomy: The Nervous System and Behavior / Neurophysiology: Conduction, Transmission, and the Integration of Neural Signals / The Chemical Bases of Behavior: Neurotransmitters and Neuropharmacology / Hormones and the Brain / PART II: EVOLUTION AND DEVELOPMENT OF THE NERVOUS SYSTEM / Evolution of Brain and Behavior / Life-Span Development of the Brain and Behavior / PART III: PERCEPTION AND ACTION / General Principles of Sensory Processing, Touch, and Pain / Hearing, Vestibular Perception, Taste, and Smell / Vision: From Eye to Brain / Motor Control and Plasticity / PART IV: REGULATION AND BEHAVIOR / Sex: Evolutionary, Hormonal, and Neural Bases / Homeostasis: Active Regulation of Internal States / Biological Rhythms, Sleep, and Dreaming / PART V: EMOTIONS AND MENTAL DISORDERS / Emotions, Aggression, and Stress / Psychopathology: Biological Basis of Behavioral Disorders / PART VI: COGNITIVE NEUROSCIENCE / Learning and Memory / Attention and Executive Processing / Language and Cognition / Appendix / Glossary

An Introduction to Brain and Behavior

International Edition
3rd edition

Bryan Kolb and Ian Q. Whishaw, both at University of Lethbridge, Canada

When it comes to making physiological psychology clear and relevant to uninitiated students, no introductory text can match *An Introduction to Brain and Behavior*. Kolb and Whishaw's

distinctive approach to contemporary brain science engages students by answering the basic questions about the interplay between brain and behaviour - answers that incorporate the latest clinical and technological developments in research with fascinating case studies. The third edition includes new technologies used to research the brain and behaviour, and features new study tools, new art, and new media support. It is the most exciting edition yet of this extraordinary text. Lecturer and student supplements are available.

Contents: What Are the Origins of Brain and Behavior? / How Does the Nervous System Function? / What are the Units of Nervous System Function? / How Do Neurons Transmit Information? / How Do Neurons Communicate and Adapt? / How Do We Study The Brain's Structure and Functions? / How Does the Nervous System Develop and Adapt? / How Do Drugs and Hormones Influence the Brain and Behavior? / How Do We Sense, Perceive, and See the World? / How do we Hear, Speak, and Make Music? / How Does the Nervous System Respond to Stimulation and Produce Movement? / What Causes Emotional and Motivated Behavior? / Why Do We Sleep and Dream? / How do We Learn and Remember? / How Does the Brain Think? / What Happens When the Brain Misbehaves? / Glossary

An Introduction to Behavior Genetics

Terence Bazzett, State University of New York at Geneseo, USA

This text guides readers through topics from the molecular structure and function of DNA to how DNA controls protein development and the neural processes that underlie both normal and abnormal behaviour.

Though focused primarily on human research, animal models are also included.

Contents: PART I: AN INTRODUCTION TO BEHAVIOR GENETICS / Introducing Behavior Genetics: Origins and History / The Basis of Genetics: DNA, RNA, Chromosomes, and Genes / Neurogenetics and Neuropharmacology / Methods of Genetic Discovery and the Human Genome Project / PART II: HERITABILITY, ENVIRONMENTAL INFLUENCES, AND METHODS OF STUDY / Simple Inheritance / Inheritance of Complex Traits / Genes and Environment / Research Methods in Quantitative Genetics / PART III: GENETIC INFLUENCES ON BEHAVIOR AND BEHAVIORAL DISORDERS / Normal Behavioral Development / Primary Cognitive Disorders / Psychiatric Disorders with a Cognitive Component / Disorders of Mood, Anxiety, and Personality / PART IV: OTHER GENETIC INFLUENCES, COUNSELING, AND THE FUTURE / Beyond Psychopathology: General Health Risks and Sex Chromosome Abnormalities / Genetic Counseling, Applied Pharmacogenomics, and Gene Therapy / The Future of Behavior Genetics / Glossary

Behavioral Genetics

5th edition

Robert Plomin, Institute of Psychiatry, UK, John C. DeFries, University of Colorado, Boulder, USA, Gerald E. McClearn, Pennsylvania State University, University Park, USA and Peter McGuffin, Institute of Psychiatry, UK

An engaging and clear overview of human and animal behavioural genetics. Thoroughly revised, the fifth edition has over twenty-five

percent new material; three new chapters, including a new and innovative integrated chapter 'Pathways Between Genes and Behavior'; over 800 new references, and new 'Close-Up' portraits of scientists working in the field.

Contents: Overview / Mendel's Laws of Heredity / Beyond Mendel's Laws / DNA: The Basis of Heredity / Nature, Nurture and Behavior / Identifying Genes / Cognitive Disabilities / General Cognitive Ability / Specific Cognitive Abilities / Schizophrenia / Other Adult Psychopathology / Developmental Psychopathology / Personality and Personality Disorders / Health Psychology and Aging / Pathways between Genes and Behavior / The Interplay between Genes and Environment / Evolution and Behavior / The Future of Behavioral Genetics

EVOLUTIONARY PSYCHOLOGY

Human Morality & Sociality

Evolutionary and Comparative Perspectives

Edited by Henrik Hogh-Olesen, Professor of Social and Personality Psychology and Head, Department of Psychology, Aarhus University, Denmark, and Co-editor of Journal of Anthropological Psychology

'This is a diverse title which provides direct insights from leading experts in the field. There are few books with a specific focus on morality

and social behaviours from an evolutionary psychology perspective and this reader fills a gap in the literature'. - Dr James Stiller, Nottingham Trent University, UK

This stimulating reader addresses all aspects of human morality and sociality from an evolutionary and cognitive perspective. Authored by six leading researchers, it discusses both the 'good' and 'bad' sides of humanity and delves into the particular behaviours, social and moral practices, and underlying psychological processes that make us human.

Contents: H. Hogh-Olesen: Human Mind - Human Kind - An Introduction / D.L. Krebs: Born Bad? Evaluating the Case Against the Evolution of Morality / F.B.M. de Waal: Morality and its Relation to Primate Social Instincts / A. Norenzayan: Why We Believe: Religion as a Human Universal / M.B. Petersen, A. Sell, J. Tooby & L. Cosmides: Evolutionary Psychology and Criminal Justice: A Recalibrational Theory of Punishment and Reconciliation / C. Boesch: Patterns of Chimpanzee's Intergroup Violence / A. Gat: The Causes of War in Natural and Historical Evolution; / J. Tooby & L. Cosmides: Groups in Mind: The Coalitionary Roots of War and Morality / H. Hogh-Olesen: Homo Sapiens - Homo Socius: A Comparative Analysis of Human Mind and Kind

Evolution and Human Behaviour

Darwinian Perspectives on Human Nature
2nd edition

John Cartwright, Senior Lecturer, Department of Biology, Chester College of Higher Education, University of Liverpool, UK

This text explains the theoretical principles of human socio-biology and evolutionary psychology, illustrating the way humans think and behave. The second edition has been updated with recent research and expanded

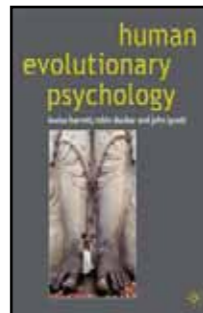

with more coverage of key topics, as well as new chapters, making it a core text. Additions include material on mental disorders, emotions and their expression.

Contents: PART I: FUNDAMENTALS OF THE EVOLUTIONARY APPROACH / Historical Introduction: Evolution and Theories of Mind and Behaviour, Darwin and After / Darwinism, Inclusive Fitness and the Selfish Gene / Sex, Sexual Selection and Life History Theory / Foundations of Darwinian Psychology / PART II: HUMAN EVOLUTION AND ITS CONSEQUENCES / The Evolution of *Homo Sapiens* / Encephalisation and the Emergence of the Human Mind / PART III: COGNITION AND EMOTION / Modularity, Cognition and Reasoning / Emotions / PART IV: COOPERATION AND CONFLICT / Kin Selection and Altruism / Conflict Within Families and Other Groups / PART V: MATING AND MATE CHOICE / Human Sexual Behaviour: Mating Systems and Mating Strategies / Human Mate Choice: The Evolutionary Logic of Sexual Desire / Incest Avoidance and the Westermarck Effect / PART VI: THE DISORDERED MIND / Mental Disorders: Some Theoretical Approaches / Mental Disorders: Some Case Studies / PART VII: WIDER CONTEXTS / The Evolution of Culture: Genes and Memes / Ethics / Epilogue: The Use and Abuse of Evolutionary Theory

Human Evolutionary Psychology

Louise Barrett, Lecturer in Psychology, University of Lethbridge, Canada, **Robin Dunbar**, Professor of Evolutionary Psychology, and **John Lycett**, Lecturer in Biological Sciences, both at University of Liverpool, UK

'A monumental work. Buy it for the bibliography list. Read it for the pleasure of seeing a powerful new field making the transition to maturity.'

- **Randolph Nesse**, M.D., Director, Evolution and Human Adaptation Program, University of Michigan, USA

Human Evolutionary Psychology is a comprehensive overview of human behaviour and psychology from an evolutionary perspective. Written in a lively and engaging narrative style, the evolutionary explanations underpinning all aspects of human behaviour, from mate choice to child development to the evolution of language, are critically assessed and evaluated. The combination of broad scope and in-depth analysis makes it the ideal introduction to this exciting and rapidly expanding area of research.

Contents: Preface / The Evolutionary Approach to Human Behaviour / Basics of Evolutionary Theory / Cooperation Among Kin / Reciprocity and Sharing / Mate Choice / Life History Constraints and Reproductive Decisions / Parental Investment Strategies / Marriage and Inheritance / The Individual in Society / Cognition and the Modular Brain / Social Cognition and its Development / Language / Cultural Evolution / References

ANIMAL BEHAVIOUR

Animal Behavior

An Evolutionary Approach
9th edition

John Alcock, Arizona State University, USA

This classic text continues to offer a balanced treatment of the underlying mechanisms and evolutionary bases of behaviour with a focus on the importance of evolutionary theory for the unification of the different behavioural

disciplines. The new edition has been thoroughly rewritten with coverage of recent work in the field. Lecturer supplements are available.

Contents: An Evolutionary Approach to Animal Behavior / Understanding the Proximate and Ultimate Causes of Bird Song / The Development of Behavior / The Control of Behavior: Neural Mechanisms / The Organization of Behavior: Neurons and Hormones / Behavioral Adaptations for Survival / The Evolution of Feeding Behavior / Choosing Where to Live / The Evolution of Communication / The Evolution of Reproductive Behavior / The Evolution of Mating Systems / The Evolution of Parental Care / The Evolution of Social Behavior / The Evolution of Human Behavior

Animal Cognition

The Mental Lives of Animals

Clive D.L. Wynne, Associate Professor of Psychology, University of Florida, USA

Covering a wide range of key topics, from reasoning and communication to sensation and complex problem-solving, this engagingly-written text presents a comprehensive survey of contemporary research on animal cognition. Written for anyone with an interest in animal cognition,

but without a background in animal behaviour, it endeavours to explain what makes animals tick. This text is ideal for psychology students who are interested in how much of our human cognition is shared by other species.

Contents: The Mental Lives of Animals: Introduction / Other Minds, Other Matters / Detecting Cause and Effect / Other Ways of Seeing the World I: Physical Dimensions / Other Ways of Seeing the World II: Abstract Dimensions / Remembering / Reasoning / Communication and Language / Conclusions and Comparisons

October 2001 240pp 234x156mm

PSYCHOPHARMACOLOGY

Drugs Handbook 2010

Glyn Volans, Director, Medical Toxicology Unit, and Consultant Physician and **Heather Wiseman**, Information Scientist, Medical Toxicology Unit, both at Guy's and St Thomas' Hospitals, UK

'Includes new drugs and omits those no longer available. It is a quick reference for those who do not have access to regularly published drug

information books.' - *Nursing Standard*

Updated annually, the *Drugs Handbook* provides easy access to information on the vast majority of medicines prescribed or bought over the counter in the UK. The 2010 edition includes new entries for herbal medicines granted Traditional Herbal Registration certificates by the Medicines and Healthcare products Regulatory Agency.

Contents: Introduction / Non-prescription Medicines / Innovations in Drug Development / Cost-effectiveness / Interactions / Drugs and Medicines / Names of Drugs / Drugs Safety Monitoring / Drugs in Pregnancy / Drug Combinations / Other Reference Sources / Abbreviations / Definitions of Drug Group Names and Medical Terms / PART I: APPROVED NAMES / PART II: TRADE NAMES / PART III: HERBAL MEDICINES / Appendix: Common Slang Names for Misused Drugs

Paperback £19.99 978-0-230-24186-2

A Primer of Drug Action

11th edition

Robert M. Julien, St Vincent Hospital and Medical Center, Portland, USA

The eleventh edition is the definitive guide to the pharmacology of drugs that affect the mind and behaviour. With over forty percent new research citations this is a clear presentation on drug action mechanisms,

etiologies of major psychological disorders, drug treatment rationales, and the uses of psychopharmacology in patient care. Lecturer and student supplements are available.

Contents: Preface / PART I: INTRODUCTION TO PSYCHOPHARMACOLOGY: HOW DRUGS INTERACT WITH THE BODY AND THE BRAIN / PART II: DRUGS THAT DEPRESS BRAIN FUNCTION: SEDATIVE-HYPNOTIC DRUGS / PART III: DRUGS THAT ARE USED TO TREAT PSYCHOLOGICAL DISORDERS: PSYCHOTHERAPEUTICS / PART IV: DRUGS THAT STIMULATE BRAIN FUNCTION: PSYCHOSTIMULANTS / PART V: ANALGESIC DRUGS AND PSYCHEDELICS / PART VI: SPECIAL TOPICS IN PSYCHOPHARMACOLOGY

Psychopharmacology

Drugs, the Brain, and Behavior

Jerrold S. Meyer, *University of Massachusetts, USA* and Linda F. Quenzer, *University of Hartford, USA*

Encompassing recent advances in molecular pharmacology and brain imaging, *Drugs, The Brain and Behavior* offers a unique breadth of coverage - from historical accounts of drug

use, through clinical and preclinical behavioural studies, to the latest research on drug effects in transgenic mouse models. The first section of the book provides extensive foundation material, including the basic principles of pharmacology, neurophysiology and neuroanatomy, synaptic transmission, and methods in psychopharmacology. The second describes the key features of major neurotransmitter systems, while the third and fourth sections discuss theories and mechanisms of drug addiction and psychopathology. The book is richly illustrated and 'Breakout boxes' ensure the student remains engaged throughout. Lecturer supplements are available.

Contents: Principles of Pharmacology / Structure and Function of the Nervous System / Chemical Signaling by Neurotransmitters and Hormones / Methods of Research in Neurobehavioral Pharmacology / Catecholamines / Acetylcholine and Serotonin / Glutamate and GABA / Drug Abuse, Dependence, and Addiction / Alcohol / The Opiates / Psychomotor Stimulants: Cocaine and the Amphetamines / Nicotine and Caffeine / Marijuana and the Cannabinoids / Hallucinogens, PCP, and Ketamine / Inhalants, GHB, and Anabolic-Androgenic Steroids / Affective Disorders / Anxiety Disorders / Schizophrenia / Glossary

NEUROPSYCHOLOGY AND NEUROSCIENCE

Neuroanatomy through Clinical Cases

2nd edition

Hal Blumenfeld, *Yale University School of Medicine, USA*

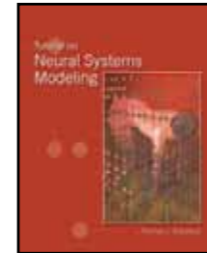

This text brings a pioneering interactive approach to the teaching of neuroanatomy, using over one hundred actual clinical cases and high-quality radiologic images to bring the subject to life. The second edition is fully updated with the latest advances in the field, and includes several exciting new cases.

Contents: Introduction to Clinical Case Presentations / Neuroanatomy Overview, and Basic Definitions / The Neurologic Exam as a Lesson in Neuroanatomy / Introduction to Clinical Neuroradiology / Brain and Environs: Cranium, Ventricles, and Meninges / Corticospinal Tract and Other Motor Pathways / Somatosensory Pathways / Spinal Nerve Roots / Major Plexuses and Peripheral Nerves / Cerebral Hemispheres and Vascular Supply / Visual System / Brainstem I: Surface Anatomy and Cranial Nerves / Brainstem II: Eye Movements and Pupillary Control / Brainstem III: Nuclei, Pathways, and Vascular Supply / Cerebellum / Basal Ganglia / Pituitary and Hypothalamus / Limbic System: Homeostasis, Olfaction, Memory and Emotion / Higher-Order Cerebral Function / Epilogue: A Simple Working Model of the Mind / Index to Cases / Subject Index

Tutorial on Neural Systems Modeling

Thomas J. Anastasio, *Associate Professor, University of Illinois, Urbana-Champaign, USA*

For students of neuroscience and cognitive science who wish to explore the functioning of the brain further, but lack an extensive background in computer programming

or maths, this new book makes neural systems modelling truly accessible. Short, simple MATLAB computer programs give readers all the experience necessary to run their own simulations. Lecturer and student supplements are available.

Contents: Vectors, Matrices, and Basic Neural Computations / Recurrent Connections and Simple Neural Circuits / Forward and Recurrent Lateral Inhibition / Covariation Learning and Auto-Associative Memory / Unsupervised Learning and Distributed Representations / Supervised Learning and Non-Uniform Representations / Reinforcement Learning and Associative Conditioning / Information Transmission and Unsupervised Learning / Probability Estimation and Supervised Learning / Time-Series Learning and Nonlinear Signal Processing / Temporal-Difference Learning and Reward Prediction / Predictor-Corrector Models and Probabilistic Inference / The Genetic Algorithm and Simulated Evolution / Future Directions in Neural Systems Modeling

Functional Magnetic Resonance Imaging

2nd edition

Scott A. Huettel, Allen W. Song, *both at Brain Imaging and Analysis Center, Duke University, USA* and Gregory McCarthy, *Yale University, USA*

This textbook provides a true introduction to functional magnetic resonance imaging (fMRI). The book presents a comprehensive overview of all aspects of fMRI, designed with undergraduate students,

graduate students and beginning researchers in mind. Lecturer and student supplements are available.

Contents: An Introduction to fMRI / MRI Scanners / Basic Principles of MR Signal Generation / Basic Principles of MR Image Formation / MR Contrast Mechanisms and Pulse Sequences / From Neuronal to Hemodynamic Activity / BOLD fMRI: Origins and Properties / Signal, Noise, and Preprocessing of fMRI Data / Experimental Design / Statistical Analysis: Basic Analyses / Statistical Analysis II: Advanced Approaches / Advanced fMRI Methods / Combining fMRI with other Techniques / The Future of fMRI: Practical and Ethical Issues

Neuroscience

4th edition

Edited by Dale Purves, George J. Augustine, David Fitzpatrick, *all at Duke University, USA*, William C. Hall, Anthony-Samuel LaMantia, *University of North Carolina, Chapel Hill, USA*, James O. McNamara and Leonard E. White, *both at Duke University, USA*

Neuroscience guides students through the

challenges and excitement of this rapidly changing field. The book's length and accessible writing are a successful combination that has proven to work equally well for medical students and in undergraduate neuroscience courses. Lecturer and student supplements are available.

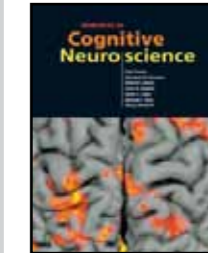

Contents: Studying the Nervous Systems of Humans and Other Animals / PART ONE: NEURAL SIGNALING / Electrical Signals of Nerve Cells / Voltage-dependent Membrane Permeability / Channels and Transporters / Synaptic Transmission / Neurotransmitters, Receptors and Their Effects / Molecular Signaling within Neurons / Synaptic Plasticity / PART TWO: SENSATION AND SENSORY PROCESSING / The Somatic Sensory System / Pain / Vision: The Eye / Central Visual Pathways / The Auditory System / The Vestibular System / The Chemical Senses / PART THREE: MOVEMENT AND ITS CENTRAL CONTROL / Lower Motor Neuron Circuits and Motor Control / Upper Motor Neuron Control of the Brainstem and Spinal Cord / Modulation of Movement by the Basal Ganglia / Modulation of Movement by the Cerebellum / Eye Movements and Sensory Motor Integration / The Visceral Motor System / PART FOUR: THE CHANGING BRAIN / Early Brain Development / Construction of Neural Circuits / Modification of Brain Circuits as a Result of Experience / Repair and Regeneration in the Nervous System / PART FIVE: COMPLEX BRAIN FUNCTIONS / The Association Cortices / Speech and Language / Sleep and Wakefulness / Emotions / Sex, Sexuality, and the Brain / Memory / Appendix: Survey of Human Neuroanatomy

Principles of Cognitive Neuroscience

Dale Purves, Elizabeth M. Brannon, Roberto Cabeza, Scott A. Huettel, Kevin S. LaBar, Michael L. Platt, and Marty G. Woldorff, *all at Duke University, USA*

Written by seven leaders in the field, this text covers the growing canon of cognitive neuroscience and makes clear the future challenges.

Richly illustrated and including helpful pedagogy, each new copy comes with *Sylvius 4*, offering an interactive tutorial on human neuroanatomy and a digital atlas of human brain structure. Lecturer and student supplements are available.

Contents: Introduction: What Is Cognitive Neuroscience? / PART I: PRINCIPLES OF NEUROSCIENCE AND THEIR IMPORTANCE IN STUDYING COGNITIVE FUNCTIONS / PART II: PRINCIPLES OF SENSORY PROCESSING AND PERCEPTION / PART III: PRINCIPLES OF MOTOR PROCESSING AND MOTOR BEHAVIOR / PART IV: PRINCIPLES OF ATTENTION / PART V: PRINCIPLES OF MEMORY / PART VI: PRINCIPLES OF EMOTION AND SOCIAL COGNITION / PART VII: PRINCIPLES OF SYMBOLIC REPRESENTATION / PART VIII: PRINCIPLES OF EXECUTIVE PROCESSING / PART IX: EVOLUTION AND DEVELOPMENT OF COGNITIVE FUNCTIONS, INCLUDING CONSCIOUSNESS / Appendix: Neural Signalling / Glossary

Fundamentals of Human Neuropsychology

6th edition

Bryan Kolb and Ian Q. Whishaw, both at University of Lethbridge, Canada

A scholarly guide to human neuropsychology with a clinical focus throughout. Thorough coverage of brain evolution unites the study of its anatomy and physiology with an understanding of its

cognitive, experimental and clinical psychological functions. The sixth edition is updated throughout and has a new full-colour design. Lecturer and student supplements are available.

Contents: PART I: BACKGROUND / The Development of Neuropsychology / Origins of the Human Brain and Behavior / Organization of the Nervous System / The Structure and Electrical Activity of Neurons / Communication between Neurons / Imaging the Brain's Activity / The Influence of Drugs and Hormones on Behavior / PART II: CORTICAL ORGANIZATION / Organization of the Sensory System / Organization of the Motor System / Principles of Neocortical Function / Cerebral Asymmetry / Variations in Cerebral Asymmetry / PART III: CORTICAL FUNCTIONS / The Occipital Lobes / The Parietal Lobes / The Temporal Lobes / The Frontal Lobes / Disconnection Syndromes / PART IV: HIGHER FUNCTIONS / Learning and Memory / Language / Emotion / Spatial Behavior / Attention, Mental Images, and Consciousness / PART V: PLASTICITY AND DISORDERS / Brain Development and Plasticity / Developmental Disorders / Plasticity, Recovery, and Rehabilitation of the Adult Brain / Neurological Disorders / Psychiatric and Related Disorders / Neuropsychological Assessment / Glossary

From Neuron to Brain

4th edition

John G. Nicholls, SISSA, Italy, Paul A. Fuchs, John Hopkins University School of Medicine, USA, A. Robert Martin, Emeritus and Bruce G. Wallace, both at University of Colorado School of Medicine, USA

In the twenty-five years since *From Neuron to Brain* was first published, the authors' aim has remained constant: to describe how nerve cells go about their business

of transmitting signals, how the signals are put together, and how, out of this integration, higher functions emerge. The fourth edition, while maintaining this focus, has been completely reformatted and updated. Lecturer supplements are available.

Contents: PART I: INTRODUCTION / Principles of Signaling and Organization / PART II: SIGNALING IN THE NERVOUS SYSTEM / Ion Channels and Signaling / Structure of Ion Channels / Transport across Cell Membranes / Ionic Basis of the Resting Potential / Ionic Basis of the Action Potential / Neurons as Conductors of Electricity / Properties and Functions of Neuroglial Cells / Principles of Direct Synaptic Transmission / Indirect Mechanisms of Synaptic Transmission / Transmitter Release / Synaptic Plasticity / Cellular and Molecular Biochemistry of Synaptic Transmission / Neurotransmitters in the Central Nervous System / PART III: INTEGRATIVE MECHANISMS / Cellular Mechanisms of Integration and Behavior in Leeches, Ants, and Bees / Autonomic Nervous System / Transduction of Mechanical and Chemical Stimuli / Processing of Somatosensory and Auditory Signals / Transduction and Signaling in the Retina / Analysis of Form in Primary Visual Cortex / Functional Architecture of the Visual Cortex / Cellular Mechanisms of Motor Control / PART IV: DEVELOPMENT OF THE NERVOUS SYSTEM / Development of the Nervous System / Denervation and Regeneration of Synaptic Connections / Critical Periods in Visual and Auditory Systems / PART V: CONCLUSION / Open Questions

COGNITIVE PSYCHOLOGY

Cognitive Psychology and its Implications

7th edition

John Anderson, Carnegie Mellon University, USA

An acclaimed text offering a systematic and accessible presentation of the theoretical foundations of higher mental processes. Addressing both neuroscientific and information-processing approaches, the book

emphasizes the importance of the representation of knowledge for the field. The new edition has been thoroughly updated throughout. Lecturer and student supplements are available.

Contents: The Science of Cognition / Perception / Attention and Performance / Mental Imagery / Representation of Knowledge / Human Memory: Encoding and Storage / Memory: Retention and Retrieval / Problem Solving / Expertise / Reasoning / Judgment and Decision Making / Language Structure / Language Comprehension / Individual Differences in Cognition / Glossary

Approaches to Consciousness

The Marriage of Science & Mysticism

Brian L. Lancaster, Professor of Transpersonal Psychology, Deputy-Head, Centre for Applied Psychology and Co-Director, Consciousness and Transpersonal Psychology Research Unit, Liverpool John Moores University, UK

'...a subtle, scholarly attempt to integrate neurophysiological and psychological with spiritual and mystical

approaches to the mystery of consciousness, thereby to consolidate consciousness studies as a fully legitimate and unitary discipline.' - Julian Candy, *Journal of Consciousness Studies*

Consciousness, and the relation between mind and brain, is a topic of contentious debate, and increasing interest amongst both academics and students of psychology. In this text, Lancaster takes a refreshingly balanced look at consciousness, bringing in approaches from neuroscience, cognitive science, depth psychology, philosophy and mysticism. With a distinctive 'transpersonal' orientation, this text will be an invaluable authoritative overview of this subject, integrating scholarship and research from diverse areas.

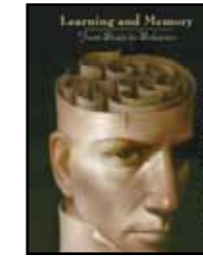

Contents: PART I: TOWARDS A UNITARY DISCIPLINE OF CONSCIOUSNESS STUDIES / The Big Picture / A Common Purpose? / PART II APPROACHES TO CONSCIOUSNESS / Spiritual and Mystical Approaches: 1. Towards Emptiness / Neurophysiological Approaches / Cognitive and Neuropsychological Approaches / The Approach of Depth Psychology / Spiritual and Mystical Approaches: 2. Towards Fullness / PART III: BEYOND WITHIN / Together Again / References

LEARNING AND MEMORY

Learning and Memory

From Brain to Behavior

Mark A. Gluck, Rutgers University, USA, Eduardo Mercado, University of Buffalo-The State University of New York, USA and Catherine E. Myers, Rutgers University-Newark, USA

'This textbook presents an exciting, well-informed, and well-written discussion of brain mechanisms of

learning and memory processes.' - John Byrnes, Ph.D. Tufts University of Medicine, University of Massachusetts, USA

This textbook shows how developments in neuroscience have changed the field of learning and memory in the last ten years. A comprehensive, accessible and engaging introduction to learning and memory, the authors cover behavioural processes, brain systems, and clinical perspectives, incorporating findings both in animals and in humans. Lecturer and student supplements are available.

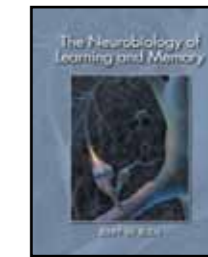

Contents: The Psychology of Learning and Memory / The Neuroscience of Learning and Memory / Episodic and Semantic Memory: Memory for Facts and Events / Skill Memory: Learning by Doing / Working Memory and Executive Control / Non-Associative Learning: Learning about Repeated Events / Classical Conditioning: Learning to Predict Important Events / Instrumental Conditioning: Learning the Consequences of Behavior / Generalization, Discrimination, and the Representation of Similarity / Emotional Learning and Memory / Observational Learning: Watching, Listening and Remembering / Learning and Memory Across the Lifespan / Language Learning: Communication and Cognition / Glossary

The Neurobiology of Learning and Memory

Jerry W. Rudy, Chair, Psychology Department, University of Colorado at Boulder, USA

To understand how the brain learns and remembers requires an integration of psychological concepts and behavioural methods with mechanisms of synaptic plasticity

systems and neuroscience. This new full-colour textbook provides a synthesis of this interdisciplinary field, each chapter making the key concepts transparent and accessible.

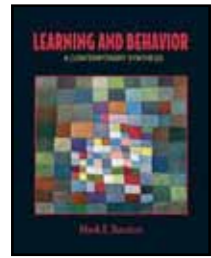

Contents: Introduction: Fundamental Concepts and Historical Foundations / PART ONE: SYNAPTIC BASIS OF MEMORIES / Mechanisms of Synaptic Plasticity: Introduction / Strengthening Synapses: Assembling Existing Parts / Strengthening Synapses: Generating New Material / Calcium: The Master Plasticity Molecule / Dendritic Spines: The Dynamic Relationship between Function and Structure / PART TWO: MOLECULES AND MEMORIES / Making Memories: Conceptual Issues and Methods / Basics of Memory Formation / Basics of Memory Storage / Memory Modulation Processes / The Fate of Retrieved Memories / PART THREE: NEURAL SYSTEMS AND MEMORY / Memory Systems and the Hippocampus / The Hippocampus Index and Episodic Memory / Ribot's Law, Systems Consolidation and the Hippocampus / Actions, Habits and the Cortical-Striatal System / Learning about Danger: The Neurobiology of Fear Memories

LANGUAGE AND THOUGHT

Language Acquisition

Edited by Susan Foster-Cohen, *Director, Champion Centre, New Zealand*

This book provides a snapshot of the field of language acquisition at the beginning of the twenty-first century. It represents the multiplicity of approaches that characterize the field and provides a review of current topics and debates, as well as addressing some of the

connections between sub-fields and possible future directions for research.

Contents: Preface / Series Preface / Acknowledgements / Notes on Contributors / PART I: EXPLAINING LANGUAGE ACQUISITION / M.Vihman: Word Learning and the Origins of Phonological System / A.M.Peters: Processing Strategies in First Language Acquisition / M.Saxton: The Inevitability of Child Directed Speech / M.T.Guasti: Universal Grammar Approaches to Language Acquisition / S.Gass: Second Language Acquisition / PART II: WINDOWS ON LANGUAGE ACQUISITION / J.Reilly: Language and the Many Faces of Emotion / J. & P.De Villiers: Complements Enable Representation of the Contents of False Beliefs: The Evolution of a Theory of Theory of Mind / N.Pouscoulous & I.Noveck: Going Beyond Semantics: The Development of Pragmatic Enrichment / K.Kuiper, G.Columbus & N.Schmitt: The Acquisition of Phrasal Vocabulary / PART III: LANGUAGE ACQUISITION, CULTURE AND LINGUISTIC DIVERSITY / N.Müller: Language Development in Simultaneous Bilingual Children / M.Hickmann: Universals and Cross-Linguistic Variability in Children's Discourse / R.Berman: Trends in Research on Narrative Development / S.McNaughton, M.Amituanai-Toloo & E.Wolfgramm-Foliaki: Family Literacy Activities: What Is, What Ought To Be and The Role of Parents' Ideas / Index

SENSATION AND PERCEPTION

Sensation & Perception

2nd edition

Jeremy M. Wolfe, *Professor of Ophthalmology, Harvard Medical School, USA, Keith R. Kluender, Professor of Psychology, University of Wisconsin, USA, Dennis M. Levi, Dean/Professor, School of Optometry, University of California, Berkeley, USA, Linda M. Bartoshuk, Bushnell Professor, Department of Community Dentistry and Behavioral*

Science, University of Florida, USA, Rachel S. Herz, Visiting Assistant Professor, Department of Psychiatry and Human Behaviour, Brown University Medical School, USA, Roberta L. Klatzky, Professor of Psychology, Carnegie Mellon University, USA, Susan J. Lederman Professor of Psychology, Queen's University, Canada and Daniel M. Merfeld, Associate Professor of Otolaryngology and Laryngology, Harvard University Medical School, USA

Written by experts on each of the senses who are supremely able to convey the excitement of the field to students, this introductory, full-colour text provides comprehensive descriptions of vision, hearing, touch, smell and taste. The second edition has been revised to include a new chapter on the vestibular system, as well as new coverage of visual development, the neural basis of object recognition, body image and out-of-body experiences, brain plasticity, pheromones and chemicals that may influence human sexual attraction, and much more. Lecturer and student supplements are available.

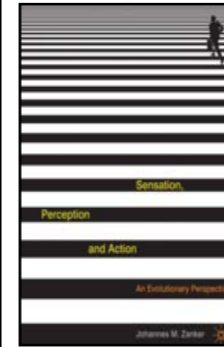

Contents: Introduction / The First Steps in Vision: Seeing Stars / Spatial Vision: From Stars to Stripes / Perceiving and Recognizing Objects / The Perception of Color / Space Perception and Binocular Vision / Motion Perception / Attention and Scene Perception / Hearing: Physiology and Psychoacoustics / Hearing in the Environment / Music and Speech Perception / Touch / Olfaction / Taste / Spatial Orientation and the Vestibular System / Glossary

Sensation, Perception and Action
An Evolutionary Perspective

Johannes M. Zanker, *Royal Holloway, University of London, UK*

'I was excited to see a book that included "Action" both in the title and content since this aspect of perception is usually missing...this book will help to complete the picture of perception and action.' - Richard Wilkie, Lecturer in Perception, Action and Cognition, University of Leeds, UK

'I thought the logical flow of ideas was one of the best aspects of this textbook. Fundamental concepts are introduced which allow the students to feel confident about the grounding of their knowledge...The book is very readable and keeps one engaged...and I think it will draw students into this area.' - Professor Alan Johnson, UCL Division of Psychology and Language Sciences, UK

With a style that is both detailed and accessible, this new text from Johannes Zanker provides students with a solid understanding of how our sensory and perceptual systems operate, and interact with a dynamic world. It not only explains the scientific mechanisms involved, but discusses the costs and benefits of these mechanisms within an evolutionary, functional framework, to encourage important questions such as: What is a given sensory mechanism needed for? What kind of problem can it solve and what are its limitations? How does the environment determine how senses operate? How does action affect and facilitate perception? This unique, interdisciplinary framework allows students to see perceiving and acting as embedded in particular environments and directs them to think about the functional nature of these systems. The overall effect is an especially readable, authoritative text on sensation, perception and action that really brings this fascinating topic to life.

Contents: Perception as Gateway to the World / The Machinery: Understanding the Neural Code / Vision 1: Brightness / Vision 2: Colour / Vision 3: From Images to Space / Vision 4: Time and Motion / Hearing 1: Sound and Noise / Hearing 2: Complex Auditory Information / Chemical Senses: Smell and Taste / Body Senses: From the Control of Posture to Touch / Focus of Interest: Attentional Modulation of Perception / Managing Information Flow Through Integration of Sensory and Motor Systems / Making Sense: Theoretical Approaches to Perception

PSYCHOLOGY OF EMOTION

Emotion

New Psychosocial Perspectives

Edited by Shelley Day Sclater, *Freelance Writer, David W. Jones, Principal Lecturer in Psychosocial Studies, Heather Price, Senior Lecturer in Psychological Studies and Candida Yates, Senior Lecturer in Psychosocial Studies, all at University of East London, UK*

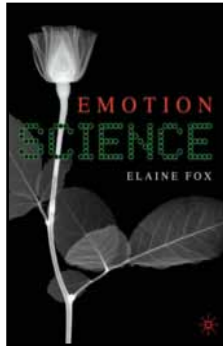

This unique collection provides a psychosocial approach to emotion, exploring the emotional undercurrents of everyday phenomena as diverse as war reporting, advertising, education, criminality, public policy and motherhood, and including contributors from sociology, psychology, cultural and media studies, and psychoanalytical studies.

Contents: PART I: A PSYCHOSOCIAL APPROACH TO EMOTION / S.Day-Sclater, D.Jones, H.Price & C.Yates: Introduction / M.Rustin: The Missing Dimension: Emotions in the Social Sciences / A.Elliott: Representation, Affect and the Theory of the Subject / J.Mitchell: Winnicott / PART II: EMOTIONS IN THE 'PUBLIC' SPHERE / B.Richards: Explosive Humiliation and News Media / J.Evans: 'Restless with Love; Full of Demands': Demotic Celebrity, Popular Emotion and Affect in the Public Sphere / C.Yates: Masculinity, Flirtation and Political Communication in the UK / H.Powell: 'Count the beats of your heart not the fingers on your hand': The Emotionalization of Promotional Culture / PART III: EMOTIONS IN THE 'PRIVATE' SPHERE / S.Clark: Thinking Psychosocially about Difference: Ethnicity, Community and Emotion / W.Hollway & T.Jefferson: Panic and Perjury: A Psychosocial Exploration of Agency / C.Urwin: Separation and Changing Identity in Becoming a Mother for White, Bangladeshi, African and African Caribbean Mothers / J.Brown: Intimacies / PART IV: PRACTICES, INTERVENTIONS AND THERAPIES / A.Cooper: 'Be quiet and listen': Emotion, Public Policy and Social Totality / L.Gelsthorpe: Emotion and Contemporary Developments in Criminology / H.Price: 'Emotional Literacy' Promotion in Schools: A Psychosocial Perspective / D.Jones: Personality Disorder, Emotion and Criminal Responsibility / N.Diamond: Between the Body and Social Trauma: Working with the Aftermath of Torture / B.Richards: Conclusion

Emotion Science

Cognitive and Neuroscientific Approaches to Understanding Human Emotions

Elaine Fox, *Professor of Experimental Psychology and Head of the Department of Psychology, University of Essex, UK*

'In this timely and significant book, Fox deftly integrates findings from cognitive psychology and from neuroscience in presenting a sophisticated and comprehensive discussion of the science of emotion. She offers important insights that sharpen our knowledge of the links among cognition, affect, personality, and neurobiology. This volume should be on the bookshelf of every scientist or student who is interested in understanding the interplay of psychological and biological aspects of emotion.' - Professor Ian Gotlib, Stanford University, USA

'...will enrich the research agenda in this dynamic and expanding field.' - Professor Jon May, University of Plymouth, UK

This is a state-of-the-art introduction to the study of emotion. Drawing on a wide array of research from psychology and neuroscience, Fox presents an integrated picture of our current understanding of normal as well as disordered emotions such as anxiety and depression. The author draws a clear distinction between emotions, moods and feelings, and suggests how they can be understood within an integrated model. The book is ideal for undergraduate and graduate courses in psychology, and will be a useful reference for active researchers.

Contents: Introduction to Emotion Science / The Nature of Measurement of Emotions, Moods and Feelings / Individual Differences in Emotional Reactivity and Regulation: Temperament, Personality and Affective Style / Categorical Approaches to the Structure of Affect / Dimensional Approaches to the Structure of Affect / Affect-Cognition Relations: Perception, Attention and Judgement / Affect-Cognition Relations: Memory / Individual Differences in Emotional Processing / Determinants of Emotional Disorders / Determinants of Resilience and Well-Being / Theoretical Overview

ABNORMAL PSYCHOLOGY / MENTAL HEALTH

Fundamentals of Abnormal Psychology

6th edition

Ronald J. Comer, *Professor of Psychology, Princeton University, USA, Practicing Clinical Psychologist and Consultant to hospitals, individual families and the Eden Institute for Persons with Autism, USA*

Drawing on his experiences in the classroom and as a practicing therapist, Ron

Comer's brief text offers balanced, integrated coverage of theories, research, disorders and treatment. His writing makes the most of students' curiosity whilst confronting misconceptions about this easily misunderstood field. The sixth edition includes more cultural coverage, more models of abnormality, more neuroscience and an updated art program. This briefer version of Comer's main text, *Abnormal Psychology*, covers the same material in a more condensed way, ideal for shorter courses. Lecturer and student supplements are available.

Contents: PART I: ABNORMAL PSYCHOLOGY IN SCIENCE AND CLINICAL PRACTICE / Abnormal Psychology: Past and Present / Models of Abnormality / Clinical Assessment, Diagnosis, and Treatment / PART II: PROBLEMS OF ANXIETY AND MOOD / Anxiety Disorders / Stress Disorders / Somatoform and Dissociative Disorders / Mood Disorders / Suicide / PART III: PROBLEMS OF THE MIND AND BODY / Eating Disorders / Substance-Related Disorders / Sexual Disorders and Gender Identity Disorder / PART IV: PROBLEMS OF PSYCHOSIS AND THE COGNITIVE FUNCTION / Schizophrenia / PART V: LIFE-SPAN PROBLEMS / Personality Disorders / Disorders of Childhood and Adolescence / Disorders of Aging and Cognition / PART VI: CONCLUSION / Law, Society, and the Mental Health Profession

Abnormal Psychology

7th edition

Ronald J. Comer, *Professor of Psychology, Princeton University, USA, Practicing Clinical Psychologist and consultant to hospitals, individual families and the Eden Institute for Persons with Autism, USA*

This is a comprehensive introduction to the field, presenting all major models of abnormality.

It features exceptional pedagogy, intriguing case studies and a stimulating art program to facilitate learning. The seventh edition features increased coverage of culture and neuroscience integrated throughout, plus a revised photo and art program. Lecturer and student supplements are available.

Contents: Abnormal Psychology: Past and Present / Research in Abnormal Psychology / Models in Abnormality / Clinical Assessment, Diagnosis, and Treatment / Anxiety Disorders / Stress Disorders / Somatoform and Dissociative Disorders / Mood Disorders / Treatments for Mood Disorders / Suicide / Eating Disorders / Substance-Related Disorders / Sexual Disorders and Gender Identity Disorder / Schizophrenia / Treatments for Schizophrenia / Personality Disorders / Disorders of Childhood and Adolescence / Disorders of Aging and Cognition / Law, Society, and the Mental Health Profession

The Myth of the Chemical Cure

A Critique of Psychiatric Drug Treatment

Joanna Moncrieff, *Senior Lecturer, University College London, UK*

'...a devastating critique of the use of psychiatric drugs...' - Rachel Freeth, *Therapy Today*

'This is a book that should change psychiatry forever.' - *Mental Health*

This controversial book overturns the claim that

psychiatric drugs work by correcting chemical imbalance, and analyzes the professional, commercial and political vested interests that have shaped this view. It provides a comprehensive critique of research on drugs including antidepressants, antipsychotics and mood stabilizers.

Contents: The Disease-Centred Model of Drug Action in Psychiatry / An Alternative Drug-Centred Model of Drug Action / Physical Treatments and the Disease-Centred Model / The Arrival of the New Drugs and the Influence of Interest Groups / The Birth of the Idea of an 'Antipsychotic' / Are Neuroleptics Effective and Specific? A Review of the Evidence / What do Neuroleptics Really Do? A Drug-Centred Approach / The Construction of the 'Antidepressant' / Is There Such a Thing as an Antidepressant? A Review of the Evidence / What do Antidepressants Really Do? / The Idea of Special Drugs for Manic Depression / Evidence on the Action of Lithium and Mood Stabilisers / Democratic Drug Treatment: Implications of the Drug-Centred Model / The Myth of the Chemical Cure

Psychiatric Drugs

Key Issues and Service User Perspectives

Jim Read, *Writer and Survivor of Mental Health Services*
 'Drawing heavily on individuals' experiences, it is the first book of its kind to explore what it is like to take antidepressants and other drugs from the viewpoint of the patient, and it contains new and provocative material about people's relationships with

some of the most debated and controversial medications around.' - *Medical News Today*

This lively book explores current dilemmas and debates on the use, effectiveness and adverse effects of psychiatric drugs, from the perspectives of people who have taken them. It includes groundbreaking research into experiences of trying to come off drugs with particular emphasis on interactions between service users and mental health practitioners.

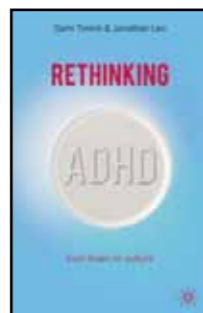

Contents: List of Critical Reflection Boxes / Introduction / Overview and Key Issues / What People Taking Psychiatric Drugs Have To Say About Them / What Is Known About Coming Off Psychiatric Drugs / Coping With Coming Off - Making The Decision / Coping With Coming Off - The Consequences / Coping With Coming Off - Three Stories / Key Issues, Suggestions and Conclusion / Appendix I: Sources of Practical Information About Coming Off Psychiatric Drugs / Appendix II: Adverse Effects When Coming Off Psychiatric Drugs / References

Rethinking ADHD

From Brain to Culture

Edited by Sami Timimi, *Consultant Child and Adolescent Psychiatrist, NHS Lincolnshire, and Visiting Professor, Lincoln University, UK* and Jonathan Leo, *Associate Professor of Neuroanatomy, Lincoln Memorial University, USA*

This book brings together, for the first time, a selection of international critiques on the role of ADHD in our society today, looking at how

diagnoses have increased in recent years and the reasons behind this. Topics range from genetics to social culture, offering a comprehensive overview of this area.

Contents: S.Timimi & J.Leo: Introduction / PART I: ADHD AND THE MEDICAL MODEL / L.Furman: ADHD: What Do We Really Know? / J.Joseph: ADHD and Genetics / J.Leo & D.Cohen: A Critical Review of ADHD Neuroimaging Research / PART II: ADHD AND CULTURE / S.Timimi: Why Diagnosis of ADHD Has Increased So Rapidly In the West: A Cultural Perspective / C.Newnes: Clinical Psychology and ADHD / B.Kean: ADHD in Australia: The Emergence of the Globalisation / S.Timimi & B.Maitra: ADHD and Globalization / N.Hart & L.Benassaya: Social Deprivation or Brain Dysfunction / PART III: ADHD DRUG THERAPIES / G.E.Jackson: The Case Against Stimulants / J.Leo & J.Lacasse: The Manipulation of Data and Attitudes About ADHD / D.Cohen, S.Hughes & D.J.Jacobs: The Deficiencies of Drug Treatment Research / B.Puri: The Role of Diet and Nutrition in ADHD / PART IV: ALTERNATIVE PARADIGMS FOR ADHD / J.Jureidini: Mind Magic / S.Sobo: ADHD and Other Sins of Our Children / C.Mercogliano: The Canary in the Coal Mine / T.Hartmann: 'Good' Science, Expectations, Villains, and Hope

Healing Our Autistic Children

A Medical Plan for Restoring Your Child's Health

Julie A. Buckley, MD, *Pediatrician in Private Practice specializing in autism disorders, co-founder of HEAL! (Healing Every Autistic Life!) and active speaker at leading autism conferences*
 Foreword by Jenny McCarthy

'An excellent roadmap for planning a journey towards healing.' - Elizabeth Mumper, M.D.,
 Medical Co-ordinator, Autism Research Institute

'An indispensable read for all parents and clinicians seeking guidance for autism spectrum disorders.' - Joey Travolta, Film Actor & Director of *Normal People Scare Me*

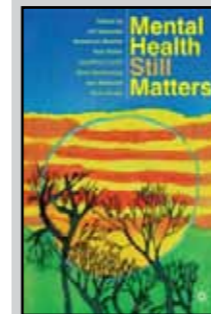

'A truly must-read book for parents and families looking for knowledge on autism spectrum disorders without going through years of medical school and countless amounts of research. Dr. Buckley puts the complicated world of autism into accessible terms.' - Tony Pashos, Jacksonville Jaguar and active member of HEAL

Every twenty minutes a child is diagnosed with a disease on the autism spectrum. While the medical establishment treats autism as a psychiatric condition and prescribes behaviourally-based therapies, Dr. Julie A. Buckley argues that it is a physiological disease that must be medically treated.

Contents: Acknowledgements / J.McCarthy: Foreword / Introduction: Gridiron Medicine / What is Autism: The Search for Acceptable Solutions / Where Recovery Lies / Mommy, I Have Fleas: Yeast, Labs, and Supplements / Jedi Knights, Yoda, and Glutathione / The Air That We Breathe: Hyperbarics / Mopping Up the Mess: Chelation / Have We Done All That We Can For This Child? / Epilogue: The Longest Marathon / Resources / Bibliography

Mental Health, Race and Culture

3rd edition

Suman Fernando, *Visiting Professor, London Metropolitan University, UK and Senior Lecturer, European Centre for Migration and Social Care, University of Kent, UK*

Review of the previous edition:

'Thorough, challenging and essential for today's society & multi-cultural professional interventions in mental

health.' - Sarah Patrick, School of Health and Community Care, Leeds Metropolitan University, UK

This is the third, significantly expanded and revised, edition of this seminal text. Incorporating additional contemporary topics, including mental health of refugees, trauma and psychosocial approaches, this text offers an illuminating account of mental health and mental disorder seen cross-culturally and internationally.

Contents: Introduction / PART 1: THEORY AND TRADITION / Race and Culture; Ethnicity and Identity / Traditional Approaches to Mental Health / Background and Culture of Psychiatry / Racism in Psychiatry / Changing Discourse in Mental Health / Trauma and Post-traumatic Stress; Suffering and Violence / PART II: PRACTICE AND INNOVATION / Application of Psychiatry: Bias and Imperialism / Asian and African 'Therapy' for Mental Health / Mental Health in Low and Middle Income Countries / Mental Health of Refugees in High Income Countries / Prospects for Plurality in Therapies for Mental Health / Mental Health for All

The Social Construction of Sexuality and Perversion

Deconstructing Sadomasochism

Andrea Beckmann, *Senior Lecturer in Criminology, University of Lincoln, UK*

This book deconstructs the pathologizing category of 'sadomasochism' in order to account for the 'lived realities' of consensual 'SM' play, emphasizing the connection between the corporeal and the political in contemporary consumer cultures. It discusses the

homogenization of desire and ownership and use of 'body' and 'sexual ethics'.

Contents: Introduction / Deconstructing 'Normalizing' Concepts / The 'Field': 'Lived Experiences' of Consensual 'SM' and 'Subjugated Knowledges' / 'Sadomasochism' - A Social Construction and its Use / Challenging Claims of a Non-violent Modernity / Consensual 'SM' as a Spiritual Practice and the Experience of 'Transcendence' / Alternative Readings of Consensual 'SM' / Bibliography

Contesting Stories of Childhood Sexual Abuse

Jo Woodiwiss, Senior Lecturer in Sociology, University of Huddersfield, UK

'This is a challenging book written from a feminist perspective. *Contesting Stories* is really about 'the self' and how therapeutic discourses shape and limit the ways in which we make sense of our lives - particularly in the context of abuse...a

thought-provoking book which must surely be widely read for the challenges to conventional thinking that it embodies.' - Carol Smart, Professor of Sociology, University of Manchester, UK

Located within a burgeoning therapeutic/self-help culture this book explores stories of childhood sexual abuse, 'recovered memories' and multiple personalities, and explodes the myths surrounding women who, without memories, redefine themselves as victims.

Contents: Introduction / A Story for Our Time / Beyond the Recovered Memory Wars / Choosing a Story: Making Sense/Finding Evidence / Making Contact: Knowledge and the Inner Child / Life with the Inner Child / Problems with the Children / The Contradictory Self / Healing and Growing Up / 'Compulsory Sexuality': Sexing the Story of Childhood Sexual Abuse / A Role for the Storytellers / Bibliography

Aspects of Violence

A Critical Theory

Willem Schinkel, Associate Professor of Sociology, Erasmus University of Rotterdam, The Netherlands

'A sparkling display of breathtaking erudition and mind-boggling analytical incisiveness.' - Zygmunt Bauman, Emeritus Professor of Sociology, University of Leeds, UK and University of Warsaw, Poland

This book provides a novel approach to the social scientific study of violence. It argues for an 'extended' definition of violence in order to avoid subscribing to commonsensical or state propagated definitions of violence, and pays specific attention to 'autotelic violence' (violence for the sake of itself), as well as to terrorism.

The Talking Cure

Wittgenstein's Therapeutic Method for Psychotherapy

John M. Heaton, Psychiatrist and Psychotherapist, UK and Lecturer, Regent's College, UK

In the last fifteen years there has been a change in direction in our understanding of Wittgenstein; the 'resolute' reading of him places great emphasis on his therapeutic intent and argues that the aim of Wittgenstein's thought is to show how language functions. This book argues that this is highly relevant to understanding psychotherapy.

Contents: Abbreviations of Wittgenstein's Work / Preface / The Problem / Introduction / Fearless Speech / Talking versus Writing / The Critical Method / Reasons and Causes / Elucidations / Back to the Rough Ground / The Self and Images / A Non-Foundational Therapy / References

Men, Masculinities and Health

Critical Perspectives

Edited by Brendan Gough, Chair of Research Committee, Division of Psychology, School of Social Sciences, Nottingham Trent University, UK and Steve Robertson, Reader in Men's Health, Centre for Men's Health, Leeds Metropolitan University, UK

This important new book provides a critical and interdisciplinary look at the role masculinity can play in men's relationships with health. Bringing together international contributors from previously disparate fields of study, it links theory with empirical research to create a fertile terrain for future debate.

Contents: PART I: CURRENT ISSUES AND DEBATES IN THE FIELD OF MEN'S HEALTH / PART II: POPULAR CONCEPTIONS OF MEN'S HEALTH AND WELLBEING / PART III: MEN, MASCULINITIES AND ILLNESS

How Power Corrupts

Cognition and Democracy in Organisations

Ricardo Blaug, Senior Lecturer in Political Theory, University of Leeds, UK

This is an interdisciplinary study of the mechanisms by which power corrupts. It incorporates political theory, organizational studies and cognitive science. In particular, it introduces advances in the field of cognitive psychology, which it uses to examine the effects of institutionalized power on how we think.

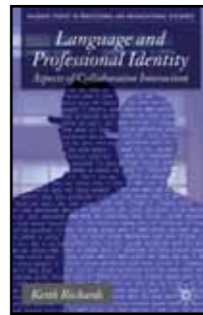

Contents: Introduction / Corruption, Power and Democracy / Psychologies of Power / Individual Cognition / Organisational Knowledge / Democratic Conclusions / Conclusion

Sex, Money, Happiness, and Death

The Quest for Authenticity

Manfred Kets de Vries, Professor of Leadership Development and the Clinical Professor of Leadership Development, INSEAD Global Leadership Centre, France

'Combining insight with his signature wit, Kets de Vries cuts to the bone as he reflects on and gently guides executives, and others, through some of the

core issues that bedevil our lives. A book that will linger in memory, creating ever-widening ripples, long after the ephemeral offerings of the usual management literature have disappeared.' - Dr. Sudhir Kakar, Psychoanalyst, Anthropologist, Novelist

'Professor Manfred Kets de Vries' insight into our motivations and levels of emotional intelligence exposes the hidden fact that lies at the heart of business behaviour; namely that we are all human.' - The Viscount Rothermere, Chairman DMGT

The four main tenets of life are explored in this unique new book that examines the issues that touch each executive, or for that matter, people in general. Based on his experiences as a psychoanalyst, professor and leadership coach, the author explores how sex, money, happiness and death affect our work and our lives in general.

Contents: Preface / Meditations on Sexual Desire / Meditations on Money / Meditations on Happiness / Meditations on Death / Afterword: The Quest for Authenticity / About the Author / Selected Bibliography

CRITICAL PERSPECTIVES

Foucault, Psychology and the Analytics of Power

Derek Hook, Lecturer, Institute of Social Psychology, London School of Economics and Political Science, UK

'This groundbreaking book provides an impassioned argument for Foucault that also locates the work in current debates in social and political theory.' - Ian Parker, Professor of Psychology, Discourse Unit, Manchester, UK

'...provides an excellent conceptual foundation and reference for the conduct of Foucaultian research...' - Ari Väänänen, *Journal of Health Psychology*

This book introduces and applies Foucault's key concepts to the field of psychology and the social sciences. Drawing on Foucault's Collège de France lectures, it argues for a historical, genealogical analysis of Foucault's work and examines a wide range of social issues such as racism, sexuality, paedophilia, subjectivity and power.

Contents: Introduction / Disciplinarity and the Production of Psychological Individuality / 'Desubstantializing' Power: Methodological Injunctions for Analysis / Discourse, Knowledge, Materiality, History: Foucault and Discourse Analysis / Foucault's 'Philosophy of the Event': Genealogical Method / Space, Discourse, Power: Heterotopia as Analytics / Governmentality, Racism, Affective Technologies of Subjectivity/Self / Index

CONCEPTUAL AND HISTORICAL ISSUES

Understanding Psychology as a Science

An Introduction to Scientific and Statistical Inference

Zoltan Dienes, University of Sussex, UK

'This is an exceptional overview of the scientific principles that underpin the discipline, and should be welcomed by teacher, researcher and undergraduate psychology student alike.' - Helen Henshaw, *The Psychologist*

'Dienes relates statistical controversies to general issues in the philosophy of science, and in so doing puts common misconceptions right. The book is full of advice that makes the difference between a mediocre and expert researcher.' - Professor Josef Perner, University of Salzburg, Austria

'I can thoroughly recommend this book. Dienes makes topics that are often dull interesting, covers positions he does not favour fairly and comprehensively, and describes all the important issues succinctly. In short, a really nice, brief, but comprehensive account of the important issues underlying psychology understanding.' - Dr. Roland Baddeley, University of Bristol, UK

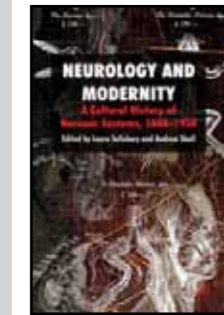

An accessible and illuminating exploration of the conceptual basis of scientific and statistical inference and the practical impact this has on conducting psychological research. The book encourages a critical discussion of the different approaches and looks at some of the most important thinkers and their influence.

Neurology and Modernity

A Cultural History of Nervous Systems, 1800-1950

Edited by Laura Salisbury, RCUK Fellow in Science, Technology and Culture, Birkbeck College, UK and Andrew Shail, News International Research Fellow in Film, St Anne's College, University of Oxford, UK

As people of the modern era were singularly prone to nervous disorders, the nervous system became a model for describing political and

social organization. This volume untangles the mutual dependencies of scientific neurology and the cultural attitudes of the period 1800-1950, exploring how and why modernity was a fundamentally nervous state.

Contents: List of Figures / Acknowledgments / Notes on Contributors / L.Salisbury & A.Shail: Introduction / M.K.House: Beyond the Brain: Sceptical and Satirical Responses to Gall's Organology / A.Shail: Neurology and the Invention of Menstruation / H.Ishizuka: Carlyle's Nervous Dyspepsia: Nervousness, Indigestion and the Experience of Modernity in Nineteenth-Century Britain / J.F.Thraillkill: Railway Spine, Nervous Excess, and the Forensic Self / A.Satz: 'The Conviction of its Existence.' Silas Weir Mitchell, Phantom Limbs and Phantom Bodies in Neurology and Spiritualism / G.Rousseau: Modernism and the Two Paranoias: The Neurology of Persecution / S.Trower: 'Nerve-Vibration': Therapeutic Technologies in the 1880s and 1890s / M.A.Tata: From Daniel Paul Schreber through the Dr. Phil Family: Modernity, Neurology and the Cult of the Case Study Superstar / V.Plock: 'I guess I'm just nervous, then': Neuropathology and Edith Wharton's Exploration of Interior Geographies / L.Salisbury: Sounds of Silence: Aphasiology and the Subject of Modernity / J.Meyer: Shell Shock as a Self-Inflicted Wound, 1915-1921 / J.Walton: Modernity and the Peristaltic Subject / M.Littlefield: Matter for Thought: The Psychon in Neurology, Psychology and American Culture, 1927-1943

MIND SHAPERS SERIES

Series Editor: Richard Stevens

The *Mind Shapers Series* profiles the life and work of key psychologists and other thinkers who have shaped our ways of thinking about the human condition. Books in the series are highly readable, written in a lucid accessible style while simultaneously offering in-depth coverage of specific ideas and contributions. They are written for the inquisitive reader as well as professionals and students. This series provides authoritative overviews of the most important ideas psychologists have given us about the human mind and behaviour and how they still apply today.

Erich Fromm

Shaper of the Human Condition

Annette Thomson, *The Open University, Glasgow University and Bell College, UK*

'Thomson offers an original and thoughtful re-examination of Erich Fromm's ideas, placing them in their intellectual and historical context and highlighting their relevance for our times. This book is scholarly, but written with refreshing clarity. I recommend it highly.' - David Ingleby, Professor of Intercultural Psychology, Utrecht University, The Netherlands

Fromm was one of the most influential psychoanalysts and social commentators of the twentieth century. Thomson's fresh look at his work introduces his views on human nature, personal relationships and therapy, showing how his unique enquiry into the human condition offers thought-provoking guidance for radical changes to society and our personal lives.

Contents: A Short Biography / Fromm's View of a Man / Loving-A Special Art? / The Art of Psychotherapy / What's Wrong with Society? / Burning Boats or Building Bridges? / The Relevance of Fromm's Ideas in our Time

Contents: A Short Biography / Fromm's View of a Man / Loving-A Special Art? / The Art of Psychotherapy / What's Wrong with Society? / Burning Boats or Building Bridges? / The Relevance of Fromm's Ideas in our Time

Burrhus F. Skinner

The Shaping of Behaviour

Frederick Toates, *Professor of Biological Science, The Open University, UK*

'This is a remarkably thoughtful and illuminating account of this major figure in psychology.' - Kent Berridge, Professor of Psychology, University of Michigan, USA

'Fred Toates offers a well-written exposition of the various controversies and contributions of B.F. Skinner arguing that Skinner's influence is comparable to that of Copernicus and Darwin.' - Susan M. Koger, Professor of Psychology, Willamette University, USA, and co-author of *The Psychology of Environmental Problems*

'I recommend this book to anyone who wants, in an interesting and enjoyable way, to learn about some of the best ideas any psychologist has had about how we might move towards more sustainable and peaceful living. Philosophical and theoretical discussions of Skinner's legacy will continue, but the practical value of his work is undeniable and this book presents his views in a way that is open to everyone.' - John Scull, PHD, retired Behavioural Neuropsychologist

An illuminating, highly readable and balanced introduction to one of the most influential thinkers of the twentieth century whose ideas continue to polarize opinion. Toates highlights how Skinner's views on behaviourism, family conflict, penal policy and issues of global survival have great relevance to society today.

Contents: Who was B.F. Skinner? / Biography, Background and Impact / Looking at the Evidence / Linking Skinner to Other Perspectives on Behaviour / The Relationship with Biology / Determinism, Freedom and Autonomy / Skinnerian Advice for Living Life / Social Policy / Development and Education / Helping to Ease Human Suffering / Ethics, Religion and the Skinnerian Good Life / The Environment and a Sustainable Future / Conclusions

Stanley Milgram

Understanding Obedience and its Implications

Peter Lunt, *Professor of Media and Communications, Brunel University of West London, UK*

'An impressive and scholarly examination of Milgram's work and intellectual legacy. Deserving of a place on the bookshelf of any academic who cares about the past, present and future of social psychology.' - Richard Wiseman, Professor, University of Hertfordshire and author of *Quirkology* and *The Luck Factor*

A fascinating introduction to Stanley Milgram, best known for his experiments on obedience. Lunt explores Milgram's influence in social psychology, looking at the implications of his work on questions surrounding political agency and subjectivity. Locating Milgram's work against a backdrop of social change, this is an engaging, authoritative read.

Contents: Milgram's Obedience to Authority Experiments / Milgram's Theory and Explanation of his Findings / The Reaction of the Psychological Community / Power, Domination and the Sociology of the Holocaust / Political Culture, Political Theory and Social Influence / The Individual in a Social World / Contemporary Resonance of Milgram's Research / Afterword

Erik H. Erikson

Explorer of Identity and the Life Cycle

Richard Stevens, *Senior Lecturer, The Open University, UK*

Erikson has been described as 'probably the most significant post-Freudian thinker' with a 'unique and profound vision'. Even President Clinton was an admirer. Stevens provides an in-depth yet accessible road map to Erikson's influential ideas on childhood development, identity, the life cycle and psychohistory, showing their relevance to the world today.

Contents: Introduction / A Brief Biography / Triple Book-Keeping / The Life Cycle / Psychosocial Identity / Psychobiographical Studies / The Nature of Erikson's Contribution / Appendix: Exercises in Self-Awareness / References / Index

George Kelly

The Psychology of Personal Constructs

Trevor Butt, *Reader in Psychology, University of Huddersfield, UK*

Kelly's pragmatic approach to psychology arose from his clinical practice and has been a strong formative influence on clinical psychology and personality theory. Taking us through the development of Kelly's work and setting it in its historical context, this is a fascinating account of one of the foremost personality theories of the twentieth century.

Contents: Preface / Issues in Personality / A Pragmatic Approach / Personal Construction and Meaning / A New Humanism / The Problem of Choice / Psychological Change and Reconstruction / The Unconscious and Human Destructiveness / A Psychology of Understanding / Further Reading / Index

March 2008	160pp	216x138mm

Sigmund Freud

Examining the Essence of his Contribution

Richard Stevens, *Senior Lecturer, The Open University, UK*

A beautifully written exposition of Freud's ideas and how they emerged from the zeitgeist of the age. Stevens offers students and general readers a stimulating and uniquely balanced assessment of Freud's work. He also examines its implications for society and for understanding the person. The best and most readable introduction to Freud available.

Contents: Preface / Prelude: The Individual as Integrator / FREUD AND PSYCHOANALYSIS / Freud-The Man / The Unconscious / Psychosexual Development / Psychodynamics / Theory of Neurosis / The Practice of Analysis as Therapy / Freud's Progeny - Developments in Psychoanalysis / THE NATURE OF PSYCHOANALYSIS / Integration and Interpretation / Psychoanalysis as Science / The Significance of Meaning / A Personal Creation / Moral Implications and Social Impact / The Relevance of Freud Today / APPENDIX: EXERCISES IN SELF-AWARENESS / References and Notes / Index

Psychopedagogy

Freud, Lacan, and the Psychoanalytic Theory of Education

K. Daniel Cho, *Assistant Professor of Education and Director, Program in Critical Theory, Otterbein College, USA*

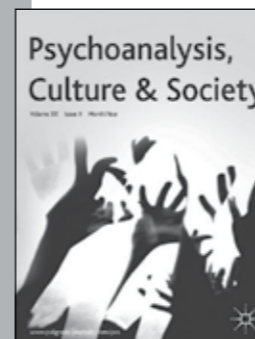

Examining the work of Lacan and Freud, Cho argues that a theory of pedagogy is already embedded within psychoanalysis. Psychopedagogy is the name given to this embedded theory.

Through a discussion of key psychoanalytic concepts, as well as a variety of other topics, Cho develops the contours of psychopedagogy.

Contents: Pedagogy with Psychoanalysis / PART I: PROLEGOMENA TO ANY FUTURE PSYCHOPEDAGOGY / The Unconscious: A Form of Knowledge / On the Ego and Other Strategies of Resistance / Transference or, When Discourses Shift: Toward a Theory of Psychopedagogical Technique / PART II: SECONDARY REVISIONS / Wo es war: Marxism, the Unconscious, and Subjectivity / Pedagogy of the Repressed or, Repetition as a Pedagogical Factor / Education by Way of Truths: Lacan with Badiou / Lessons of Love: On Pedagogical Love / Teaching Abjection: The Politics of Psychopedagogy

POPULAR PSYCHOLOGY

In Your Face

The New Science of Human Attraction

David Perrett, *Professor of Psychology, University of St Andrews, UK, recipient of the 'Golden Brain' Award for his discoveries about the way the brain processes faces, pioneer of the use of computer graphics to study the perception of facial attributes such as beauty, health and personality, and editor of Processing the Facial Image and Brain Mechanisms for Perception and Memory: From Neuron to Behaviour*

What makes a face attractive? Why are we attracted to certain faces and not others? In this highly readable account from the frontiers of psychology, one of the world's foremost experts in face perception, David Perrett, explains how the human face evolved and how our perceptions of the face affect our judgments of others' personality, health, trustworthiness, and suitability as a friend or lover.

Extreme Fear

The Science of Your Mind in Danger

Jeff Wise, *Science Writer, Contributing Editor at Popular Mechanics and Travel and Leisure, Writer for the New York Times Magazine, Popular Science, Outside, National Geographic and more*

'Extreme Fear is extremely good, extremely important, and extremely well-written.'
 - Christopher McDougall, author of the New York

Times bestselling *Born to Run: The Rise of Ultra-running and the Super-athlete Tribe*

'Jeff Wise has a knack both for gripping accounts of real adventure and an impressive understanding of cutting-edge science.'
 - Robert Young Pelton, author *The World's Most Dangerous Places*

An acclaimed science journalist offers a riveting account of how people process extreme fear. Having jumped out of planes and scaled vertical cliff faces, Wise uses his adventures and draws on current brain research to weave an energetic tale of how the human spirit uses fear to triumph in the face of challenges.

Couch Fiction

A Graphic Tale of Psychotherapy

Philippa Perry, *Author; Psychotherapist, Psychotherapy Supervisor, Fine Art Graduate, UK*
 Illustrated by Junko Grant
 Afterword by Andrew Samuels

'I loved it. I smiled and laughed. And nodded.'

One to read for sure.' - Susie Orbach, Author and Columnist

'The charming pictures show psychotherapy working; the witty and brilliant notes explain how and why.' - Dr Stella Tillyard, author of *Aristocrats*

What is it like to be a fly on a psychotherapist's wall? This compelling case study in the form of a graphic novel vividly explores a year's therapy sessions as a search for understanding and truth. Told in a witty and thought-provoking manner, each engagingly illustrated scene is accompanied by deft commentary.

skills4study CAMPUS

New for 2010! An *interactive* online study skills resource for students

Students' lack of study skills can be a barrier to their learning, and can hold you back from teaching your chosen subject. **skills4studycampus** is a flexible solution, offering e-learning modules on four of the core skills needed for student success:

- Writing Skills
- Referencing and Plagiarism
- Reading and Note-Making
- Critical Thinking Skills

As an interactive online resource, **skills4studycampus** enables students to learn in their own time and space, in a way that suits them. As their tutor, you can be involved as much or as little as you like, using the resource in-class or assigning it for self-study.

skills4studycampus is quality-assured. It has been developed by the team behind the UK's bestselling student text - *The Study Skills Handbook* - including Stella Cottrell, and in consultation with study skills and online learning experts from a range of universities.

Watch a free online demo at www.skills4studycampus.com

To arrange a free trial or request price information, please ask your librarian or learning resources manager to contact onlinesales@palgrave.com or phone +44 (0)207 0144225

The screenshot displays the skills4studycampus website. At the top, there is a navigation bar with links for Home, My pathway, My tags, My gradebook, Downloads, Glossary, and More resources. Below this is a main content area with a sidebar on the left. The sidebar lists four main skill areas: Writing Skills, Critical Thinking, Referencing and Plagiarism, and Reading and Note-making. Each area has a sub-menu with specific topics. The main content area features a large image of students and a 'Welcome to skills4studycampus' message. To the right of the main content is a sidebar with a search bar, a 'Tip of the day' section, and a 'What's new' section. The footer includes the Palgrave Macmillan logo and copyright information.
